

Senior Protocol Engineer

Description

About the Role Youâ€™ll be at the ground floor of Tensor building novel protocols that bring NFT & digital assets trading to the world. You will: Ship new protocols on Solana, EVM-based chains, Bitcoin, and Move-based chains Design on-chain primitives that enable efficient on-chain digital assets trading Own projects end-to-end: from protocol to SDK design and implementation You are: Excited about web3/crypto/NFTs. We really cannot overstate this – youâ€™ll be joining a team of web3 nerds A protocol engineer with 3+ years of experience building on-chain protocols that have touched 100,000+ users and/or millions in TVL Experienced with one (or more) of the following: Solana, Solidity/EVM, Bitcoin (ordinals, runes, PSBTs), Move Bonus points for: Contributions to widely-used and reputable OSS projects Experience shipping full-featured apps that hook into protocols youâ€™ve designed and implemented Strong fundamentals in statistics, math, or quantitative finance Good intuition on when to move fast/break things vs when to move carefully What youâ€™ll get: Generous ownership & stake in the company. Weâ€™re looking for owners ðŸ‘Œ A fast-paced, no-BS environment Flexible working hours & hybrid schedule Top-of-the-line M3 Macbook Pro and peripherals Our stack is Rust (Solana protocol) and TypeScript (back-end & front-end). Location Weâ€™re remote-first. The founding team is in Toronto, and youâ€™re welcome to join us there, but you donâ€™t have to. Please mention the word ****BENIFITS**** and tag `RMzQuMjlzLjEwNC4xMjA=` when applying to show you read the job post completely (`#RMzQuMjlzLjEwNC4xMjA=`). This is a beta feature to avoid spam applicants. Companies can search these words to find applicants that read this and see they're human.
