Senior Software Engineer

Description

About Us:At Cudo Ventures, Our vision is to enable more efficient use of the world’s computing resources. Through our innovative platforms and network, we use spare computing power to create a decentralized, sustainable and connected world. Our aim is to empower people and organizations to earn and save through cheaper, accessible, and sustainable computing by utilizing spare capacity.Beyond building just another technology product – we’re building a sustainable future for our planet. As a leader in the rapidly growing cloud computing industry, we’re on a mission to reduce the carbon footprint of the cloud and empower organizations of all sizes to access and trade computing resources globally. We’re creating a fairer, more transparent marketplace for computing resources that benefits everyone and we are extending this technology into the blockchain industry.If you’re passionate about tech for good, and want to be part of a team that’s making a real difference in the world, then we want to hear from you to join our growing team!We are scaling and hiring talented people globally to join us on our journey. Regardless of age, education, ethnicity, gender, sexual orientation, or any personal characteristics, we want everyone to feel welcome. We are committed to building a diverse and inclusive equal opportunity workplace everyone can call home. For more information, please visit us at www.cudoventures.com and www.cudos.org . You must be located within UTC +/- 3 hours to be considered for this role and have the legal right to work in your location.The Role:We are looking for a Senior Software Engineer to join a small engineering team working on the Cudos blockchain product and surrounding apps; contributing to the growth of Cudo. You’ll be actively collaborating with the rest of the team to expand our product offering on the Blockchain side of the business. What you’ll get to do: Design, develop, test and maintain user-facing features and improvements to theÂ blockchain and its surrounding products in a secure, well-tested, and performant way. Consistently deliver features and improvements autonomously as well as collaborating with other team members. Solve technical problems of high scope and complexity.Â Advocate for and write code that meets defined standards for style, maintainability, andÂ best practices for a high-scale web environment. Work with the wider blockchain team and other stakeholders to iterate on newÂ features, and to ensure consistency and health of the network. What you’ll bring with you: Strong ability to prioritize tasks and make decisions based on both the needs of theblockchain team and of the wider business. Experience in a fast paced, remote DevOps environment. Proactivity and an active pursuer of communication and work efficiency. Have an operational mindset and the ability to recognise and implement improvement. Keen interest in the blockchain space. Significant, proven full-stack software developer experience. Significant, proven experience in software development with Go. Proven experience in blockchain development. Proven blockchain development experience in the Cosmos ecosystem. Experience architecting and designing solutions or features end-to-end, breaking up thework for other engineers to complete, and ensuring their work meets the standardsrequired for the solution. Experience working with financial services, ideally cloud hosting solutions and/orcryptocurrencies in a production environment. Applicable experience and skills in product UI/UX design would be desirable.Â What we offer: Share options and CUDOS token options. Unlimited holiday policy – we don’t believe in limiting how much time you need to rest away from work. 100% Remote working Fantastic opportunities to develop – we have a habit of promoting in house. A great team with a passion for working collaboratively. Cycle to work/tech scheme (UK employees only) Enhanced family friendly policies Flexible environment If you don’t hear from us within 4 weeks please consider your application unsuccessful on this occasion.Please mention the word **ENRAPTURE** and tag RNjIuMy4zNi4xOTg=
