

Fullstack Engineer

Description

Founded in 2020, by Ayush Ranjan and Susmit Lavania – Huddle01 is on a mission to democratize digital connectivity by building the 1st DePIN for RTC(real-time communication), focused on data privacy, quality and community-driven scalability. The sustainable and efficient economic models behind this people-powered communication network will allow anyone & everyone with relevant capabilities to run and operate a Huddle01 Node and be the provider of minutes in our Network and get incentivized for the same. While apps, leveraging or built on top of our infrastructure, will consume the minutes provided by these Node operators. Till date, Huddle01 has raised \$5.1M and its vision is backed by some of the leading funds including HiveMind, M31 Capital, Superscript, Protocol Labs, and angels like Balaji Srinivasan, Juan Benet, Sandeep Nailwal, and Dan Romero. About the Role: Huddle01 is seeking a talented and experienced Fullstack Developer to join our team. As an Fullstack developer, you will be responsible for designing and developing scalable software. Key Responsibilities: Develop front-end applications using React, NextJS, TypeScript, and TailwindCSS, focusing on coding, debugging, and implementing features from designs. Convert design files from Figma into functional, visually appealing web components with a strong focus on detail and adherence to design specifications. Ensure technical feasibility and consistent visual language across platforms. Collaborate with the UX/UI design team to understand design intent and ensure the best user experience is delivered through front-end functionalities. Learn and apply responsive design principles to ensure applications work seamlessly across a variety of devices and screen sizes. Participate in code reviews, learn from feedback, and adopt best practices in front-end development. Support the development and maintenance of a clean and organized front-end codebase. Engage in continuous learning to stay updated with emerging front-end technologies and trends, sharing insights and suggestions with the team. Qualifications: Demonstrable experience or projects in front-end development using React, NextJS, TypeScript, and TailwindCSS is preferred. Experience with web markup, including HTML5 and CSS3. Familiarity with translating design files (Figma, Sketch) into web applications. Good problem-solving skills and attention to detail. A passion for front-end development and a commitment to continuous learning and improvement.
