Software Development Engineer

Description

About the Senior Software Engineer Position: We are looking for a talented and fast-paced engineer with 8+ years experience to join our team and assist with product expansion. Stord engineers work within a team to contribute, improve, and scale our software; you'll fully own entire features and influence the specs, build out/modify the back-end (Elixir/Phoenix) and interact with the front-end (React), and own on-going improvements for a product rapidly impacting the entire third-party logistics (3PL) industry. Each member of the team has the ability to impact all aspects of the development process from ideation, design, delivery, maintenance, and operations. What You'll Do: Own the software as you create, test, iterate, and deliver new features to the Stord platform Work across the company to understand customer and vendor pain points, come up with solutions, and then prototype, iterate, and launch daily Be surrounded by smart, driven individuals who are passionate about doing their best work every day Solve a wide variety of technical challenges as well as supply chain challenges that have yet to be solved Ensure that information security (IS) commitments and requirements are incorporated into the information technology processes, and that managers are enforcing IS policies and procedures in their departments. What You'll Need: Passion for building the highest-quality software that delights the user Effective communication skills Flexibility to move quickly with a startup Ready to learn Elixir/Phoenix; experience with MVC frameworks Experience with React or React Native Appreciation of a test-driven and code-review culture Experience turning wireframes into production-level features The ability to write clean, reliable, and highly maintainable code The drive to solve problems â Bonus Points: Previous startup experience Experience with Elixir or functional programming Previous logistics or supply chain experience Please mention the word **ACHIEVEMENTS** and tag RMzQuMTQ1LjE1My4xMjA= when applying to show you read the job post completely (#RMzQuMTQ1LjE1My4xMjA=).
