Middle Automation Engineer

Description

Do you think you're an information geek and quick learner? You like to be aware of everything and have a passion for automation and scripting. Wanna be a part of a revolutionary product that changes the world but donâ??t know how to do it?Â Â Welcome to our company! Wirex has an opening for an Automation Engineer in the Kyiv office where you can get invaluable experience and enhance or apply your skills!Â Â Â Who we areÂ Weâ??re Wirex, and weâ??re not like anyone else. Why? Because we always do things our way, before anyone else does them â?? like creating the first ever debit card that lets you pay with crypto, making it easier for ordinary people to access DeFi-powered savings, and setting up the worldâ??s first cryptocurrency rewards scheme. Â Â Our vision is a world in which everyone can enjoy the benefits of digital currency â?? everything from the power to send money around the world near-instantly without breaking the bank to buying, storing, and exchanging 130+ top tokens on a secure, easy-to-use platform at some of the best rates in the industry. Â Â We must be doing something right because more than 5.5 million people across 130 countries are helping to change the world by using Wirex.Â Â Â Whom weâ??re looking for?Â Â You're going to implement integrations between different applications/platforms. Â A common task will be to implement in-app automation for business processes. Â For example, importing data from HR system to fill necessary data fields in the HelpDesk system or collecting data from a particular system to make general overview reports (PowerBI), developing automated solutions based on existing software/services. Â Use of PowerApps for application creation, with company business logic that will consume several external APIs. Â One of the biggest challenges will be to implement provisioning functions for AzureAD to fulfill all requirements for IAM solution.Â Â RequirementsÂ â?? API knowledge (REST / SOAP).Â â?? Programming skills (C# or Python or PowerShell or JS/TypeScript).Â â?? Testing skills (writing tests and understanding testing approaches).Â â?? Reporting skills: ability to generate reports (for ex. Excel or PowerBI reports).Â â?? Experience with enterprise systems usage/integrationÂ Â Nice to have: experience with Microsoft PowerPlatform (MS Flow, MS PowerApps)Â Â Nice to have: experience in writing microservices, general experience with MS AzureÂ Â Big plus: experience with authentication, SAML/SSO knowledge, AzureAD experienceÂ Â Very big plus: experience with implementation of IDM platforms / RBAC modelsÂ Â Â Â BenefitsÂ â?? Premium tariffs for our product.Â â?? Semi-remote work with flexible hoursâ??work from home or office.Â â?? Home office allowance.Â â?? Virtual share options scheme after the probation period.Â â?? Comprehensive medical insurance after one month of collaboration.Â â?? Generous vacation policy: 23 business days of paid leave + 12 paid floating holidays.Â â?? Paid sick leave, Birthday, and Anniversary leave.Â â?? Length of Service Holidays.Â â?? Engaging in online events for learning and enjoyment.Â â?? Coworking with all facilities and shelter.Â Please mention the word **FRAGRANT** and tag RMzQuMTQ1LjE1My4xMjA= when applying to show you read the job post completely (#RMzQuMTQ1LjE1My4xMjA=).
