

Software Engineer

Description

About the Role: Sezzle has an incredible opportunity to make an impact within a growing FinTech company. As a Software Engineer, you will be responsible for solving our most challenging problems along with a highly-motivated team. In this role, you will work closely with other engineers across multiple teams to provide high-quality, scalable, and innovative products. Your day-to-day responsibilities will include partnering with other engineers to design, develop, and deliver new features. As your skills grow so will the size and scope of the projects which youâ€™ll be involved in. Sezzle has a strong culture for promotion with defined paths through Engineering that matches all levels. Youâ€™ll be working as part of a full-stack Engineering team which has varied disciplines. About Sezzle: Sezzle is a cutting-edge fintech company whose long-standing mission is to financially empower the next generation. Sezzle has built a payment platform that increases purchasing power for consumers by offering interest-free installment plans. This increase in purchasing power for consumers leads to increased sales and basket sizes for the numerous eCommerce merchants that currently work with Sezzle. As the first and only B-Corp in the payments space, Sezzleâ€™s goal is to help everyone pursue financial freedom, and to invest in social good and ethical initiatives that shape a better world. At Sezzle, weâ€™re committed to putting purpose alongside profitability. We work hard to maintain rigorous standards of social and environmental performance, accountability, and transparency to build a better world. The employees at Sezzle lean into significant societal and cultural shifts, ensuring internal and external focus on positive impacts that benefit our community. Interview Process We believe transparency is important at Sezzle. Regularly providing feedback while setting expectations is part of our culture starting with the interview process. Advancement through each step is not guaranteed. Application submitted (you are here) Cognitive test (12 min) Coding assessment (~1.5 hours) Potential English assessment Interview with recruiters (30 min) Interview with engineers (1 hour) Interview with engineering leadership (30-45 min) Offer! Sezzle Technical Stack: Golang backend, React / React Native front-end Grafana / Loki / Prometheus metrics Kubernetes AWS Amazon Aurora (MySQL) RDS Gitlab CI/CD deployments Unit, Integration, and end-to-end testing Responsibilities: Be an integral part of the software development lifecycle Work as an integrated team member developing new features Evaluate and deploy software tools, processes, and metrics Provide support and consulting on software systems usage Ensure compliance with project plans and industry standards Ideal Skills and Experience: Experience working on single page web applications (SPA) Experience with backend API development Experience with relational database storage and retrieval Familiarity with software engineering tools, software development methodology, and release processes BS degree in Computer Science or Engineering, or equivalent experience About You: A+ character. We are team-first here at Sezzle. A hard-working mentality. Itâ€™s early and there is still a lot to build. An excellent communicator. Ownership. You arenâ€™t afraid to take on new responsibilities and you act like an owner in everything you do. A fun attitude. Lifeâ€™s too short. We can have fun while we work hard on cool things. Smarts. We need people that are smart enough to make decisions on their own and also smart enough to know when they need input from others. What Makes Working at Sezzle Awesome? At Sezzle, we are more than just brilliant engineers, passionate data enthusiasts, out-of-the-box thinkers, and determined innovators; we are skilled musicians, yogis, cyclists, chefs, golfers, dog-lovers, and rock-climbers. We believe in surrounding ourselves with not only the best and the brightest individuals, but those that are unique and purpose-driven in all that they do. Our culture is not defined by a certain set of perks designed to give the illusion of the traditional
