

Senior Web3.js Developer

Description

ABOUT US We are like-minded, curious, excitable people here at Chiliz who work well in teams, spread across the globe. Chiliz is a global blockchain company, which powers Socios.com – the creators of Fan Tokens, and the popular fan rewards platform. Socios has partnered with some of the world's best teams, including Paris Saint-Germain, Juventus, FC Barcelona, Atlético de Madrid, UFC, Galatasaray, Manchester City FC, Davis Cup, and many more. The curious nature of a Chilizen is what drives this company forward, and since we are looking to grow even more, apply for your dream role today.

OUR BRANDS & CHANNELS We are building the web3 infrastructure for sports & entertainment! Founded in 2018, Chiliz is a blockchain provider focused on the sports and entertainment industry. We build scalable, secure blockchain-enabled solutions that supercharge fan experiences using digital assets. \$CHZ is the native digital token for the Chiliz sports & entertainment ecosystem currently powering Socios.com and the Chiliz Chain blockchain. Socios.com is a fan engagement and rewards app that allows fans to engage with their favourite teams and clubs through digital assets known as Fan Tokens.

THE ROLE Due to continued growth, we are looking to recruit a Blockchain Engineer- EVM Specialist to join our team of talented developers who share a common interest in distributed systems, their scalability, and continued development. You will be part of the team responsible for building the Chiliz chain that powers the Socios platform.

Duties & Responsibilities:

- Building Web3 interfaces that are directly interacting with the blockchain
- Mentor and guide other engineers in advancing their skills and knowledge in Blockchain development
- Maintain and improve existing products
- Work closely with engineers and product managers on new features
- Ensure code quality through tests, in accordance with good practices
- Participate in code reviews
- Anticipate scalability and performance issues
- Be a force of technical and functional proposals

Requirements:

- 3+ years of experience in developing Blockchain applications
- Must be based in Europe
- Strong communication skills, including the ability to mentor and effectively convey complex technical concepts
- Good knowledge of EVM compatible chains
- Experience working on any of the following: EVM clients (ex: go-ethereum/ geth, bsc-geth, ..)
- Low level tokenomics
- Consensus mechanisms (ex: Parlia, Clique, PoW, Lachesis, BFT, ..)
- Very good knowledge of Solidity or Vyper
- Good knowledge with best practices for securing smart contracts and App development
- Good knowledge of tools like: Hardhat, Truffle, Foundry, Brownie, Slither, Solhint, etc.
- Knowledge of decentralised infrastructure: components such as IPFS, Swarm, and Whisper.
- Good level of basic tools: Git, VSCode, JIRA
- Ability to work remotely, independently and collaboratively in a team
- Excellent verbal and written communication skills
- Willing to explore new things; curious
- Good to have: Any other Blockchain knowledge (other blockchains, scaling solutions, ..)
- Previous mentoring experience

WHAT WE OFFER We offer you the chance to grow, to learn, to flex your creative muscles, and to work on a project that is providing excitement to millions of users. During our interview process, you can ask us anything and get to know your team too. We need this to work both ways: It's not just about you fitting in, but about us being the right fit for you too. Are you ready to work with the world's best sports teams? Are you happy to try, fail, and try again? Are you excited to keep pushing the boundaries of technology? We have got offices across the world, over 30 nationalities in our ranks and the most important superpower of all – flexibility. Our competitive salaries, wellness allowance, healthcare and pension plan are just the tip of the iceberg. You will gain friends, experience and a good challenge, we will gain you.
