

Server Side Engineer

Description

Server Side Engineer – Remote About Brave Brave is on a mission to protect the human right to privacy online. Weâ€™ve built a free web browser that blocks creepy ads and trackers by default, a private search engine with a truly independent index, a browser-native crypto wallet, and a private ad network (opt-in!) that directly rewards you for your attention. And weâ€™re just getting started. Already 50 million people have switched to Brave for a faster, more private web. Millions more switch every month. The internet is a sea of ads, hackers, and echo chambers. Big Tech makes huge profits off our data, and tells us whatâ€™s true and whatâ€™s not. Brave is fighting back. Join us! Summary Brave is looking for an experienced server side engineer who can help build our Brave Premium infrastructure. Our goal is to significantly improve the robustness and reliability of the Brave Premium backend system. We are looking for a high-impact individual who prefers a simple solution over a complex one and who can take whole solutions from end to end. Requirements Experience with Go, JavaScript/TypeScript Experience with SQL, Postgres, Redis and other related data storage technology Experience building robust API endpoints Experience with AWS and deploying production systems at scale Experience deploying monitoring solutions like Prometheus, Zabbix, Pingdom, etc A 24x7 uptime mindset and the willingness to manage and be part of pager duty rotation Experience with software development via distributed development teams Comfortable working in an open source setting A passion for helping protect usersâ€™ privacy and security Written and verbal communication skills in English Proven record of getting things done Bonus Points Experience with Rust Experience with Ruby on Rails Experience with payment systems including the Stripe APIs Experience with subscriptions and APIs for the App Store and Play Store Familiarity with the world of cryptocurrency, especially Ethereum / Solana Working at Brave Industry-leader in privacy, with a research and engineering team thatâ€™s innovating everyday to keep people safer online and beat Big Tech Highly competitive salaries & benefits, and generous home-office stipends Fully remote team (no office, no commute) Welcoming, humble, ridiculously smart teammates, and a truly flat org structure Opportunity to get in early at a hyper-growth company, and revolutionize the web Oh, and did we mention Brendan, our CEO & co-founder, invented JavaScript? United States Candidates: The salary range for this role is \$130,000 – \$180,000 USD, depending on experience.
