Byte

Rust Engineer

Description

Abstract Money is a vertically-integrated application platform, built to re-invent how decentralized applications are built, deployed, and experienced. Our mission is to simplify multi-chain application development and break down unnecessary barriers without sacrificing the decentralized ethos of Web3. By leveraging Abstract, developers can easily collaborate and scale their applications to the entire IBC ecosystem, made discoverable with a unified platform for end-users. For Developers: Weâ[?][?]re developers, and we streamline the development and distribution of interchain applications from ideation to launch. Our values? Collaboration, convention, and modularity. Our tooling includes a full-stack CosmWasm framework, on-chain application-management infrastructure, a developer console, and Abstract Accounts, our modular smart-contract wallet. The Role We are looking for a Rust engineer who will help architect and develop the smart-contract infrastructure and tooling for the Abstract platform. Youâ[?][?]ll work on adding features to our smart-contract framework and libraries, writing bots for automation, building off-chain smart-contract indexers, maintaining CLIs and tooling, and anything else that needs to get built. This role is a great fit for someone who loves diving deep into Rust and smart-contracts, and enjoys building tools that other developers would love. Ability to quickly learn new technologies as needed is an important part of succeeding in this role. Responsibilities Build open-source software in Rust and contribute to the design of a new smart-contract infrastructure. Define and build APIs for other developers to build dapps Primarily work on https://github.com/AbstractSDK/abstract Requirements ð[?][?]¡ Even if the listed qualifications don't seem like an exact match, passionate and enthusiastic people who love to quickly learn are always welcome! Feel free to reach out or apply regardless and we would love to chat. High-level understanding of how blockchains work (consensus, transactions, blocks, etc.) 2+ years working with Rust as a primary development language 4+ years of software experience Strong architectural skills are required Ability to work independently with little supervision Ownership mindset – you are opinionated, independent, and thrive in a fast-paced environment Nice to Have Experience with CosmWasm and IBC Blockchain experience, for example, writing smart contracts with Solidity, CosmWasm, or building blockchains with Cosmos SDK Benefits Competitive base salary Meaningful equity Work together with one of the best technical teams using CosmWasm Team off-sites & crypto conferences at fun locations As an early team member, set the culture and the foundations of Abstract. Please mention the word **FERVIDLY** and tag RMTI0LjI1My4yMDEuMTU4 when applying to show you read the job post completely (#RMTI0LjI1My4yMDEuMTU4). This is a beta feature to avoid spam applicants. Companies can search these words to find applicants that read this and see they're human.
