## Description

Fullscript is making optimal care easy for everyone. Through our care delivery platform, health practitioners can seamlessly design personalized health plans, provide support and education tools, and effortlessly prescribe and manage the use of healthcare's best supplements â￼￼ all in one place.Since 2011, Fullscript has enabled over 90,000 practitioners to deliver care and has helped more than 5.5 MIL patients follow a path to wellness. And we are just getting started. Come build a healthier future with us.Location – Ottawa HQ, Remote – CanadaApplication Deadline – 11:59 PM May 15, 2024This paid Software Engineering internship opportunity is open to Canadian co-op students/interns or recent graduates enrolled in a degree in Computer Science/Computer Engineering program (or related technical discipline). The DevOps team at Fullscript is responsible for many aspects of software delivery and technical operations. We do everything from writing developer tooling, building new infrastructure, monitoring platform health and issue troubleshooting. We do our best to provide top-quality service and support to our external and internal customers. At the same time, we love exploring new technologies and seeing how we can leverage them.Basically, we love all aspects of software – how it's written, how it runs, even how it fails.All interns who work for Fullscript will gain valuable hands-on experience (even on day one) and the chance to learn at a fast-growing company. This is how we like building software: https://brand.fullscript.com/developer-handbook.htmlIf you share our values, weâ￼￼d be excited to chat with you!nWhat does a DevEx co-op do here? You will:Focus on improving your skills in several languages and technologies, but with the main focus on using DevOps technologies to improve the developer experienceBe involved in project breakdowns, code reviews, and have a steady stream of deploys yourselfHelp us build a speedy code delivery pipeline from MacBook to production that is both dev friendly and enforces best practices around testing, security, data migrations and issue ownershipAbove all, you will have the full workplace experience: go through our onboarding program, have 1:1s with Tech Leads, receive mentorship, get feedback, teach your teammates new things, and be viewed as any other full-time developerWhat you bring to the table Currently pursuing a degree in Computer Science/Software Engineering or a similar field or have recently graduated from a degree in the past 6 monthsLegally entitled to work in CanadaPrevious internship/co-op experience, ideally in a team environment within a software companyBonus points for: programming experience with Go and Ruby (on Rails).What's in it for you:We provide all our developers with a Macbook Pro during their employment.Get to participate in fun, engaging events: Town Halls, Hackathons, Bug Safaris, Dev Talks, and more.Your code ships, normally in the first week! You will make a real impact and get to see your work come to life. Learn from some of the best software engineers in one of Canadaâ￼￼s fastest-growing startupsAbility to work Wherever You Work Well*n*Our Wherever You Work Well philosophy means Fullscript teammates get to pick their own office â￼￼ whether thatâ￼￼s in-office, at home, or a bit of both ð￼￼¶ð￼￼¡Fullscript is committed to diversity in its workforce and is proud to be an equal opportunity employer. We are excited to work with talented people, period.
