Our culture at Trace3 embodies the spirit of a startup with the advantage of a scalable business. Employees can grow their career and have fun while doing it! Trace3 is headquartered in Irvine, California. We employ more than 1,200 people all over the United States. Our major field office locations include Denver, Indianapolis, Grand Rapids, Lexington, Los Angeles, Louisville, Texas, San Francisco. Ready to discover the possibilities that live in technology? Come Join Us! Street-Smart – Thriving in Dynamic Times We are flexible and resilient in a fast-changing environment. We continuously innovate and drive constructive change while keeping a focus on the big picture. We exercise sound business judgment in making high-quality decisions in a timely and cost-effective manner. We are highly creative and can dig deep within ourselves to find positive solutions to different problems. Juice – The Stuff it takes to be a Needle Mover We get things done and drive results. We lead without a title, empowering others through a can-do attitude. We look forward to the goal, mentally mapping out every checkpoint on the pathway to success, and visualizing what the final destination looks and feels like. Teamwork – Humble, Hungry and Smart We are humble individuals who understand how our job impacts the company's mission. We treat others with respect, admit mistakes, give credit where it's due and demonstrate transparency. We bring the weather by exhibiting positive leadership and solution-focused thinking. We hug people in their trials, struggles, and failures not just their success. We appreciate the individuality of the people around us. About the Role: As a Data Analyst at Trace3, you'll develop dashboards and analytics solutions for clients, transforming datasets to provide clear, actionable insights that drive business decisions. Your role will involve developing solutions with leading analytics technologies, often Microsoft Power BI, engaging with clients to understand their unique business needs, and translating these into technical specifications. Using your expertise with data analysis and a consultative approach, you'll provide expert advice and insights, ensuring our analytics solutions resonate with a broad spectrum of businesses and drive informed decision-making. What You'll Do: Develop comprehensive analytics solutions, often in the form of dashboards, to provide actionable insights and drive informed decision-making. Demonstrate substantial technical expertise in one or more data analytics solutions such as Microsoft Power BI to integrate, prepare and visualize data. Engage in consulting tasks, offering expert advice and insights to both internal and external stakeholders. Perform as a business analyst, adept at communicating with a diverse range of stakeholders and end-users. Collaborate with clients to gather and document requirements, identify key business needs and translate those into technical specifications. Integrate seamlessly with client teams, adapting to various business environments and challenges. Develop and optimize SQL queries, stored procedures, and scripts for data transformation and extraction. Collaborate with data scientists and analysts to understand data requirements and ensure data availability. Implement data quality checks and data validation processes to ensure data accuracy and consistency. Utilize Databricks for advanced data processing, transformation, and analytics. Manage and optimize data storage. Build and maintain data warehouses and analytics solutions. Create interactive reports and dashboards using Power BI for data visualization and insights. Monitor and troubleshoot data pipelines, addressing any issues in a timely manner. Stay up-to-date with the latest Azure data technologies and best practices. Required
