Senior Product Manager

Description

Mission Brief:Gamers and Web3 enthusiasts, it's time to level up! We're scouting for a heroic Senior Product Manager with a passion for Web3. As our Product Commander, you'll embark on an epic quest, steering our product development ship from the drawing board to the digital shores of launch and beyond. Rally with our engineering wizards, design artists, and business development strategists to forge innovative products powered by the magic of Web3.Who we areGame7 is a community formed to accelerate the adoption of Web3 gaming through crowdsourcing, to create public goods that can be owned by many. Itâ\[?\]\[?\]s a home for those who want to influence, shape, and build a better gaming industry, where the interests of players and developers are aligned.We are building a gaming nation, one that represents over 3 billion players and $200 billion in annual economic activity.Our nation is governed by meritocracy, a system where a citizenâ\[?\]\[?\]s contributions, not capital, grant them status, rewards and influence. Itâ\[?\]\[?\]s this philosophy that will create a more equitable and sustainable gaming future.As part of this, we are building targeted products and offerings that specifically address the challenges that the industry desperately needs solutions forQuest Objectives: Chart and navigate the product roadmap through the uncharted territories of our Web3 offerings. Lead your party of cross-functional teams to discover and prioritize product features that boost growth, engagement, and treasure (revenue). Embark on market research quests and analyze player feedback to uncover trends and opportunities in the Web3 realm. Craft product scrolls (requirements), narrate user stories, and conjure detailed product specifications for new features and enhancements. Sync with the engineering guild to align their arcane efforts with the product roadmap. Master the art of A/B spellcasting and user research to validate product theories and enhance performance. Analyze performance metrics like a sage and let the data guide your product strategies. Ensure that product launches are not only timely but also meet the high standards of quality worthy of a champion. Keep a vigilant eye on rival kingdoms and stay updated with the latest trends and emerging technologies in the Web3 world. Skills and Arsenal Required: 5+ years of experience in the product management arena, with at least 2 years specializing in Web3 or blockchain quests. Deep knowledge of Web3 artifacts including blockchain, smart contracts, and decentralized applications. A proven battle record of leading victorious product campaigns in a dynamic, cross-functional battlefield. Exceptional problem-solving, analytical, and decision-making abilities. Leadership skills of a high lord, with the ability to rally and collaborate effectively with diverse teams and stakeholders. Skilled in the arts of user research, gathering feedback from the common folk, and using data for product strategy. Proficiency in Agile development methodologies â\[?\]\[?\] think of it as your strategic combat style. A degree scroll in Computer Science, Engineering, or a related magical field. Epic Bonus Skills: Experience with Ethereum, Solidity, or other blockchain platforms. History of building and launching Web3 applications or products. Familiarity with mystical Web3 storage technologies like IPFS and Filecoin. A strong grasp of the cryptocurrency and digital asset markets. Mastery of Web3 development tools like Truffle, Remix, or Hardhat. Experience in rallying communities or marketing for Web3 products. Loot and Rewards:Join us on this grand adventure as a Web3 Product Commander, where you'll not only gain fame and glory but also enjoy a trove of rewards including competitive riches, flexible questing hours, and the chance to collaborate with a fellowship of talented adventurers on thrilling and impactful projects. Your journey to reshape the digital world begins now!Please mention the word **MASTERPIECES** and tag RMzQuMjI0LjI3LjEzMg== when applying to show you read the job post completely (#RMzQuMjI0LjI3LjEzMg==).
