

Senior Backend DevOps Engineer

Description

Requirements Experience with running commodity hardware and servers at scale such as managing multiple instances on AWS, OVH, Azure etc. Experience running blockchain nodes and modifying blockchain node software, particularly geth, OP stack, and any zk rollup. Has multiple prior contributions to open source node software or open source DeFi protocols that are of sufficient complexity (contributions should be publicly verifiable). Proficient in 2 of the following programming languages: Go, Rust, Javascript/TypeScript, Python. Candidates should be able to design and reason about blockchain architecture and contribute novel ideas to developing unique blockchain software that does not exist yet. Such as unique blockspace markets and designing modular node components for data-availability (DA) and multi-VM execution environments. Important MUST be self directed and have initiative, given basic criteria for a task. We are flexible with execution and design. Willing to work Pacific Time give or take a few hours Nice to Have Work experience at a â??Topâ?? crypto organization: Coinbase, Uniswap, Ethereum, Optimism, Arbitrum, Lido, Cosmos, Binance, Kraken, Polygon etc etc – ie a well known crypto company with a lot of users building highly scalable systems with a lot of data. Experience designing unique mechanisms/protocols at the blockchain level (like mempool searchers/MEV and advanced DeFi dapps) Prior experience running/staking ETH consensus forming nodes directly. Benefits Fully remote position, live and work from anywhere in the world Strong independence and freedom to build and lead your part of the protocol Competitive salary with career growth to executive roles possible Generous FXS token allocations and other tokens/bonuses/perks Please mention the word **STRIVING** and tag RNDQuMjExLjlyMS4xODk= when applying to show you read the job post completely (#RNDQuMjExLjlyMS4xODk=).
