Fullstack Engineer

Description

AboutWeâ??re building Omni: a platform allowing developers to deploy applications across all rollups without fragmenting liquidity. Weâ??re looking for early team members to help us bring this ambitious vision to life.Weâ??re a team who already built a platform that processed over $70M leading to our $18M fundraise from top investors including Pantera, Two Sigma Ventures, Coinbase Ventures alongside angel investors including Stani Kulechov (founder of Aave), Sandeep Nailwal (cofounder of Polygon) and more. In addition to this our most recent testnet onboarded over 300,000 users in less than two months. We are growing rapidly and we need ambitious and experienced team members to join us to help scale Ethereum's future.About the roleEngineers who join in this role will be responsible for building frontend applications and Solidity based smart contracts to highlight our product suite.Responsibilities Build the end user facing applications that empower users to interact with our technologies. Build Solidity based tooling and template repositories. Build Typescript based tooling to help improve our developer experience and accelerate our business development growth. Consistently simplify the experience of using Omni's technologies by building tooling tooling around the core network functionalities. Requirements 2+ years of Solidity smart contract development with at least one production grade deployment that handled over $10m in TVL. 3+ years of Typescript development across the SDK, backend and frontend levels. 1+ year developing with a Web3 specific Typescript SDK like WAGMI, Ethers.js or Web3.js. Competencies Excellent communicator â?? must be able to distill complex technical concepts and communicate them effectively to partners. Action oriented â?? we are looking for people who take action by default, consistently driving forward progress without asking for permission UX oriented engineer â?? must be energized by the idea of using their abilities to create seamless user applications in an industry notorious for difficult user experiences. Autonomous â?? must be able to take high level concepts from product and BD and autonomously own the completion of those technical deliverables from architecture design to production deployment. Systematic â?? proactively takes effort to track their responsibilities and map them out using best practices so that the wider team can better understand progress on multiple dimensions. Our benefits include competitive compensation, early stage equity allocations, team outings and unlimited PTO. In addition, you'll join a team of high caliber team innovating at the frontier of crypto that work collaboratively to help one another accelerate their personal growth.We are a mission driven company. We believe deeply that through software engineering we can build a self-sovereign society. In our day to day, we make decisions based upon our company values of Individual Autonomy, Long-Term Orientation and Open Access.The future belongs to all of us, independent of our origins. Omni is an equal opportunity employer and does not discriminate on the basis of race, religion, color, sexual orientation, gender or any other status protected under federal, state or local law.Please mention the word **HERO** and tag RNTQuMjAzLjEwMi4yMDQ= when applying to show you read the job post completely (#RNTQuMjAzLjEwMi4yMDQ=).
