Senior Product Manager API

Description

Explore a new world of possibilities: At HomeToGo, weâ��re on a mission to make incredible accommodation easily accessible for everyone. Our team is united by a passion for travel, driven by innovation and impact, and guided by open-minded leaders at every level. Our commitment to recognizing and empowering exceptional talent is the foundation of our growth. An amazing journey of opportunity with an international team lies ahead – join us!   Your future contribution: As a Senior API Product Manager at HomeToGo, you will lead the strategy, development, and adoption of our API platform, driving innovation and delivering value to our customers and partners. You will play a key role in shaping the future direction of our API products and driving cross-functional collaboration to ensure their success. How youâ��ll add value: Lead the development of the vision, strategy, and roadmap for our API products, aligning with business objectives and market opportunities. Collaborate with cross-functional teams including engineering, design, marketing, sales, and customer support to prioritize and plan API feature development. Define clear product requirements and specifications, working closely with engineering teams to ensure successful execution and delivery. Drive API adoption and usage by developing and executing go-to-market strategies, including developer outreach, educational initiatives, and community engagement. Monitor API performance and usage metrics, identify areas for improvement, and implement strategies to optimize API scalability, reliability, and usability. Act as a thought leader and subject matter expert on API-related topics, providing guidance and support to internal teams, customers, and partners. Stay informed about industry trends, competitive offerings, and emerging technologies in the API space, and incorporate relevant insights into product strategy. Mentor and coach junior members of the product management team, fostering their growth and development.   Youâ��ll be successful in this role if you: Bachelor's degree in Computer Science, Engineering, Business, or a related field; Master's degree preferred. 5+ years of experience in product management (preferably in the travel industry), with a focus on API products and platforms. Proven track record of successfully defining and executing API product strategies that drive business growth and customer value. Strong technical background with a deep understanding of API design principles, RESTful architecture, and web technologies. Excellent communication and collaboration skills, with the ability to effectively engage with stakeholders at all levels of the organization. Demonstrated leadership abilities, with experience leading cross-functional teams and driving consensus on product priorities and decisions. Experience with API analytics, developer relations, and community management is highly desirable. Passion for technology innovation and a commitment to delivering exceptional customer experiences.   At HomeToGo, weâ��re on a mission to make incredible accommodation easily accessible for everyone. Our team is united by a passion for travel, driven by innovation and impact, and guided by open-minded leaders at every level. Our commitment to recognizing and empowering exceptional talent is the foundation of our growth. An amazing journey of opportunity with an international team lies ahead – join us!   Your future contribution: We're on the lookout for a top-notch team player to step into the role of Senior Software Engineer (PHP) within our Paid Marketing team. This opportunity allows you to dive into the world of enhancing and managing our extensive marketing applications and handling systems for millions of paid marketing campaigns. Your contribution will be crucial in the ongoing development and care of our product. How youâ��ll add value: Collaborate closely with business stakeholders to plan and execute a data-
