

Senior Backend Engineer

Description

Aircall is a place where voices are valued. Backed by over \$220 million of investment since 2015, we create technology that fuels accessible, transparent and collaborative communication to empower our base of 18,000+ customers (and growing) to make authentic, human connections. Conversation is a cornerstone of our culture. Wherever our people find themselves in the Aircall world â Paris, New York, Sydney, Madrid, London, Berlin, or at home â everyone has a voice that is valued. Whatever your background, wherever youâre from â we want you to join the conversation. Letâs talk. We are looking for engaged and passionate Senior Software Engineer to join our growing engineering department and be part of our Core Platform team. As a Senior Backend Engineer, you will be responsible for the design, development, deployment, and operation of business-critical features that add customer value. Operational excellence, metrics, observability and best practices, evangelization, and mentoring in your team and across the whole of Engineering will be part of your day to day job. Quality, excellence, and agility drive our delivery processes and you will help us level these up. Using Ruby and Typescripts back-end stacks, appropriate for each requirement, but always hosted on AWS, we build added value and resilient services on top of voice and fully integrate with our customersâ business critical tools (CRM, Helpdesk, E-Commerce, â).
Your mission @ Aircall: Be part of an engineering organization delivering high quality, secure, and scalable solutions to Aircall clients. Write clean scalable code using Ruby and Typescript / Node.js, test and deploy applications and systems. Have key responsibilities within the requirements analysis, solution design, architecture, and end-to-end delivery of key modules in order to provide business solutions. Involvement in product and platform performance optimization and live site monitoring. Mentor junior team members.
A little about you: You have at least 5+ years of experience in back-end development, using Ruby / Ruby On Rails, with a focus on delivering for security, scalability, availability, and performance. Experience with Typescript/Node.js is a plus. You have worked extensively with AWS in a production environment, preferably for high volume / high availability services and understand how to design for, deploy on and get the best out of, the environment and services provided by Amazon. You are rigorous with code quality and other engineering best practices (testability, maintainability), and are accustomed to using systems such as Jira, Confluence, GitLab, GitHub, etc. Clean Code, Clean Architecture, Test Driven Development, Behaviour Driven Development and Continuous Integration/Deployment are the way you design, develop and release software. You possess effective and proactive communication skills, and can collaborate with different profiles and roles. A proven experience with Domain Driven Design would be a plus. We know that success comes from smart work and deserves to be recognized and rewarded. We value people who are bold, ambitious, collaborative and customer-centric. Weâre a global community growing together. If you love a good challenge, enjoy solving meaningful problems, and want to be a part of one of the fastest-growing B2B startups, then Aircall is the company you are looking for! Aircall offers a unique work environment and the chance to collaborate with diverse teammates across continents. Weâll provide freedom and tools to allow you to thrive at your best, and foster an environment you can do it in. Why join us? ð Key moment to join Aircall in term of growth and opportunities ð â Our people matter, work-life balance is important at Aircall ð Fast-learning environment, entrepreneurial and strong team spirit ð 45+ Nationalities: cosmopolite & multi-cultural mindset ð Competitive salary package & benefits (health coverage, lunch, commute, sports) DE&I Statement: At Aircall, we believe diversity, equity and inclusion, irrespective of origins, identity, background and orientations, are core to

our Aircall journey. We promote active inclusion to foster a strong sense of belonging which is one of our main strengths as a business. We strive to assemble diverse people that can enrich and learn from each other. We pledge to make sure everyone not only has a seat at the table but is valued at the table — providing equal opportunities to develop and thrive. We will constantly challenge ourselves to make sure that we live up to our ambitions around diversity, equity and inclusion, and keep this conversation open because we realize that we have work to do and much to learn.
