Senior Frontend Engineer

Description

About Boost:Boost is building a distributed incentives network so that anyone can incentivize any onchain action with any token. We're doing this to make token distribution easier & more efficient, which contributes to our mission of improving global coordination. Boost is a Series A company with a crypto-native, remote team with backgrounds from companies like Optimism, OpenSea, Dapper Labs, and Coinbase.In this role, you'll operate as a product engineer and 0-1 and take features from conception to implementation. You'll be working directly with boost creators to make it easier and more efficient for them to distribute token incentives.Responsibilities: Write frontend code while maintaining a high degree of craftsmanship Work cross-functionally to define, design, and deliver new features. Troubleshoot, optimize, and improve the performance of existing codebases Own and drive feature development from idea to adoption Keep up-to-date with the latest developments in the crypto industry to ensure our products and services stay at the forefront of innovation. Participants in customer discovery calls, learning more about what their needs are to better scope projects Requirements: At least 5 years of experience as a frontend engineer, with a minimum of 1 year in the crypto industry. Strong technical depth with React, Tailwind, NextJS, and Typescript A strong understanding of relational databases, data modeling, and API definition. Deep understanding of user-centered design principles, along with the ability to create intuitive and visually stunning user interfaces that solve user problems. Excellent communication skills and the ability to work well in a remote team environment. Nice-to-have: Ability to write backend code Familiarity with React Native An eye for design and interest in getting deep in the pixels What we offer: Competitive salary and equity package, with full benefits. Opportunity to work with a talented and passionate team in crypto If you're a highly motivated frontend engineer and a strong passion for crypto, we'd love to hear from you.Please mention the word **EASING** and tag RMzQuODYuMTYzLjE1Mg== when applying to show you read the job post completely (#RMzQuODYuMTYzLjE1Mg==).
