

Senior Smart Contract Engineer

Description

Epic Adventure Overview: In the vast digital kingdom of blockchain, a new quest awaits! We seek a valiant Senior Smart Contract Wizard with a grand saga in NFT development to join our team of digital explorers. In this prestigious role, you'll conjure smart contracts to empower our NFT ecosystem. Allied with fellow product strategists, design sorcerers, and engineering knights, you'll weave potent and scalable magic for our platform. Who we are: Game7 is a community formed to accelerate the adoption of Web3 gaming through crowdsourcing, to create public goods that can be owned by many. It's a home for those who want to influence, shape, and build a better gaming industry, where the interests of players and developers are aligned. We are building a gaming nation, one that represents over 3 billion players and \$200 billion in annual economic activity. Our nation is governed by meritocracy, a system where a citizen's contributions, not capital, grant them status, rewards and influence. It's this philosophy that will create a more equitable and sustainable gaming future. As part of this, we are building targeted products and offerings that specifically address the challenges that the industry desperately needs solutions for. Your Heroic Responsibilities:

- NFT Smart Contract Craftsmanship:** Forge, enhance, and deploy impregnable smart contracts on blockchain battlegrounds, with a special focus on NFT artifacts. Apply the ancient wisdom of code quality, security, and gas conservation.
- NFT Architecture Enchantment:** Collaborate with the product council to architect the technological backbone for NFT-centric features. Lead the charge in NFT development, shaping the future of our digital dominion.
- NFT Standards and Integration Mastery:** Keep your knowledge as sharp as a dragon's tooth on the latest blockchain innovations, NFT standards, and industry movements. Integrate emerging protocols and mystical services into our NFT ecosystem.
- Testing and Auditing Alchemy:** Perform rigorous testing, debugging, and auditing of your smart contract creations to ensure they withstand the tests of functionality, security, and compliance. Embrace automated testing spells and conduct code reviews for a steadfast codebase.
- Optimization and Scalability Wizardry:** Continually enhance your smart contract spells for peak efficiency, scalability, and performance. Tackle any bottlenecks and potential threats lurking in our NFT ecosystem.
- Collaboration and Leadership Valor:** Provide guidance and wisdom within your team, elevating the technical knowledge of your fellow adventurers. Share your expertise in smart contract development and NFT lore.
- Documentation and Knowledge Chronicles:** Forge comprehensive technical tomes, including architectural blueprints, coding standards, and best practices. Cultivate an environment of learning and sharing within your fellowship.
- Your Arsenal and Spells (Requirements):** Academic Scrolls: Bachelor's or Master's scroll in Computer Science, Engineering, or a mystical equivalent.
- Battle Experience:** Minimum 6 years as a Smart Contract Engineer, with a legendary focus on NFT development. Experience in integrating with NFT platforms, marketplaces, and protocols.
- Problem-Solving Wizardry:** Strong analytical skills to solve complex technical puzzles. A keen eye for detail, ensuring code quality, security, and efficiency.
- Collaboration and Communication Charisma:** Excellent interpersonal skills for effective collaboration with cross-functional teams. A positive team spirit, fostering a unified and collaborative environment.
- Thirst for Knowledge:** A burning passion to stay abreast of the latest blockchain and NFT technologies. Eagerness to learn new magical languages and frameworks.

Join our Quest! Embark on this journey and play a pivotal role in the NFT revolution. Apply today with your updated resume, showcasing your epic tales and achievements in the realm of smart contracts and NFTs. Your adventure starts here!
