

Clojure Engineer

Description

If you want to advance your career in a progressive, fast-paced (fully remote) setting, alongside a passionate team dedicated to tackling intricate challenges through cutting-edge technologies, then we'd love to hear from you! We are a technology-oriented consulting company specializing in developing near-real-time, highly available analytics platforms in the cloud. We have clients across a variety of industries, including healthcare, fintech, motor vehicle manufacturing, and major media. We have established a robust professional bond with our offshore staff and desire to enhance our engineering team in South America. At present, we are actively seeking engineers located in South America.

About the role: This project is with an existing ThorTech healthcare client that we have worked with for the past 3 years. We are heavily embedded in the client's organization and have had great experience working with this client. They are looking for several Clojure contractors to come on board ASAP to help with an internal application.

Qualifications:

- 5+ years experience in software development
- 2+ years experience with Clojure/ClojureScript
- Strong Experience with database systems (Datomic experience would be a plus)
- AWS Experience is highly preferred, but they are also open to anyone with Cloud Services Experience
- Familiarity with basic data structures and algorithms
- Excellent communication and interpersonal skills

Others:

- This is 40 hours/week; EST hours
- This is a contract opportunity until December, with the possibility to extend
- \$45 - \$55 an hour

ThorTech Solutions is a company that invests in its employees. We help our team advance their skills by allowing them to attend selective training and conferences.

ThorTech Solutions is an Equal Opportunity-Affirmative Action Employer

Minority / Female / Disability / Veteran / Gender Identity / Sexual Orientation.
