Rust Engineer

Description

About the position Regardless of your role, you'll have massive ownership and freedom and have the opportunity to work with a variety of technologies across the stack (and across blockchains). This role is fully remote. Technologies we currently use ð��¦�Â Rust & ð����Â Python AWS as our main cloud provider Postgres / Redis / Kafka / S3 / Prometheus What youâ��ll do at Blowfish Maintain & ship features to our custom Solana node Improve our proprietary Solana multi-transaction simulator Stay abreast of the latest features adopted by the Solana ecosystem and ensure our products evolve to support them Write and deploy Solana smart contracts when necessary Build an engineering culture that attracts the most talented people to join us We'd love to hear from you if… You want to be part of an early team with a lot of new product to build You are excited about working with blockchain technologies You enjoy tackling big problems with unknown solutions You're comfortable creating something from nothing You are detail-oriented and care deeply about developer experience You're known to be pro-active and are driven by curiosity You can handle complexity, but prefer simplicity Qualifications 4+ years full-time software engineering experience 1+ years full-time experience working with Rust 1+ years full-time working with EVM technologies Experience building and maintaining a production system at scale. Why Work with Us Opportunity We are a tight-nit team of blockchain industry veterans solving one of the largest problems facing the mass adoption of crypto: transaction security. Despite being a year old, we have already integrated into Phantom, the leading wallet on Solana with millions of users as well as many other wallets across the Solana & EVM ecosystems. We are scanning millions of transactions each week for malware and scams and are helping keep their users safe. Transaction security is a high leverage way to make a difference in the world â�� protecting users funds and enabling them to give informed consent when entering digital agreements involving their finances and other ownership rights. We support EVM and Solana blockchains and will be adding more chains over time. Benefits ð���� Significantly above market rate equity compensation package â�� giving you meaningful ownership is important to us ð�§�â��â��ï�� Comprehensive health insurance ð��» Stipend for your ideal remote / WFH set-up: laptop, headphones, and any other work gear you may need. ð���ï�� Unlimited vacation with an enforced 20 day minimum policy: Take time off when you need it. â�°ï�� Paid travel – team on-sites in different parts of the world, several times a year Please mention the word **AGILELY** and tag RMzQuODYuMTYzLjE1Mg== when applying to show you read the job post completely (#RMzQuODYuMTYzLjE1Mg==).
