

Physical Security Program Manager

Description

CoreWeave is looking for an independent and autonomous Physical Security Specialist to manage the security of people and property in CoreWeave's data center spaces. Some of the verticals you will own include system design, bid evaluation, construction administration, and system commissioning for concurrent projects across multiple regions. You'll evaluate products and vendors, and test new technologies to find the right solutions for CoreWeave and our customers. This role reports directly to our Director of Physical Security. What your days will consist of: Create system designs using industry standard tools such as AutoCAD and BlueBeam Create scopes of work and prepare bid documentation Seek bids for projects, and award projects based upon established criteria Monitor construction progress and oversee vendor payment Participate in test and commissioning Create and manage a preventative maintenance program Coordinate with security operations for ongoing monitoring and moves/adds/changes Maintain relationships with various manufacturers and integrators, and with CoreWeave's co-location partner network Continuously improve through education and by participating in new certification programs Conduct site evaluations and report findings to Security team and leadership Wondering if you're a good fit? We believe in investing in our people, and value candidates who can bring their own diversified experiences to our teams even if you aren't a 100% skill or experience match. Here are some qualities we've found compatible with our team. If a lot of this describes you, we'd love to talk. Your Experience: Professional certification (e.g. PSP, CPP, etc.) 10+ years in electronic physical security, including 5+ years in a data center environment Manufacturer certifications from major Physical Security providers, such as Genetec, Axis, HID, Suprema Axis Certified Professional Experience using Bluebeam, AutoCAD and/or Revit Network administration experience with certifications Experience with IT network topologies and basic routing/switching Experience with basic Cyber Security principles (e.g. Comptia Security+, Comptia Network+, Cisco Certified Network Associate) Ability to manage competing priorities in a fast-paced environment and meet deadlines per project scope Demonstrated ability to present complex, technical information to both technical and non-technical audiences Excellent technical writing, presentation, and documentation skills Ability to work with minimal supervision, attention to detail, and follow-through Willingness to learn new technologies/toolsets as an ongoing part of the role Willingness to travel up to 25% to data centers, conferences, and our HQ in Roseland, NJ CoreWeave is a fast growth startup – things move quickly and it's a dynamic environment! Please note that in this role, you will sometimes need to be available outside of regular business hours to support critical issues or meetings. Our compensation reflects the cost of labor across several US geographic markets. The base pay for this position ranges from \$85,000-\$115,000. Pay is based on a number of factors including market location and may vary depending on job-related knowledge, skills, and experience. Hybrid Workplace Successful candidates will be expected to attend onboarding training at our NJ Headquarters within their first several weeks of employment, with subsequent quarterly travel requirements of 1 week duration. If you reside within a 30-mile radius of our New Jersey, New York, or Philadelphia offices, we're excited for you to join us at the office at least three times a week, recognizing the significance we place on fostering connections, collaboration, and creativity within our office culture. Our commitment to operating as a hybrid workplace underscores our dedication to enabling our employees to tailor their work-life balance to their individual preferences.
