

Senior Infrastructure Engineer

Description

Are you passionate about building and scaling next-generation infrastructure? Do you thrive in a fast-paced environment where you can make a real impact? If so, then join our rockstar infrastructure team at Telnyx! We're building a cutting-edge, cloud-agnostic platform that spans continents and empowers our product teams to achieve amazing things. In this role, you'll not only collaborate with a talented team to deploy and maintain our infrastructure provisioning automation, but you'll also have the opportunity to: Shape the future: We value your input! You'll collaborate with engineering teams to identify pain points and continuously improve our internal architecture for scalability and resilience. Become a cloud native expert: Deepen your knowledge of service mesh, container technologies, and CI/CD pipelines. Level up your skills: Learn about every technology stack Telnyx uses and become a well-rounded infrastructure engineer. You'd Be A Good Fit If You Have 3+ years of professional software development and infrastructure operations experience. Strong experience in Kubernetes management and applications development. Better if you have managed on-premises clusters. Proficiency on at least one programming language (Python, Golang, etc). Expert knowledge of at least one configuration language (Ansible, Puppet, Terraform, etc). Experienced in shaping and improving CI/CD infrastructure design, architecture, and implementation support. General knowledge of container technologies, linux networking and operating systems. Candidates MUST have a good understanding of basic networking protocols like (DNS, HTTP, TLS). Knowing other networking protocols like BGP is a plus. Knowledge of service discovery and service mesh architectures is a big plus. Growth Opportunities: Act as a strength multiplier to product engineering efforts. Learn about every technology stack used at Telnyx. Work at the intersection of the social and the technical, with growth opportunities in both. Please mention the word **PRECISELY** and tag RMy43OS4yNTUuMTM5 when applying to show you read the job post completely (#RMy43OS4yNTUuMTM5). This is a beta feature to avoid spam applicants. Companies can search these words to find applicants that read this and see they're human.
