

Software Engineer I India

Description

About Aspire Aspire.io is the world's first word-of-mouth commerce platform that leverages your brand's ambassadors, influencers, affiliates, customers, user-generated content, and social ads to accelerate marketing results across paid, owned, and earned channels. Since 2014, Aspire's industry-leading software platform, combined with our award-winning Agency Services team, has served household names such as M&Ms, Keurig, Samsung, HelloFresh, Dyson, and many other high-growth ecommerce companies while paying out \$100M to creators around the world. We're growing across the board – and we're looking for a Software Engineer – I(FullStack) to join our distributed remote Engineering team! With a strong focus on growth and personal development, Aspire is the perfect place to develop your skills in a fast-paced, forward-thinking environment. The Role We're looking for an experienced product-driven developer that wants to help us build innovative solutions to support the ongoing success of great brands and their communities across the world. As a Software Engineer, you'll work closely with product managers, designers and fellow engineers as a technical leader for critical areas of our product and codebase. You can expect to lead large-scale features and projects on our web applications while working with an open and collaborative team. Technologies used at Aspire: Languages/Frameworks: NodeJS, React, Typescript, Python, GraphQL, Django Database: PostgreSQL (Google Cloud SQL), Google Cloud Datastore Testing: Jest, Playwright Monitoring: Datadog, Rollbar, Google Error Monitoring, Stackdriver Logging Infrastructure/Systems: Docker, Google Kubernetes Engine, Google Cloud Tasks, Auth0 Development Tools: Github, Jira, VS Code, Storybook What you'll be working on: Developing build user-facing features on our platform to solve customer problems and drive user engagement and satisfaction Implementing bug fixes and UX improvements to our brand and creator web portals Partnering with product managers, designers, and other team members to understand our users and improve their experience with the product Following standards and implementing engineering best practices for development and operational excellence for your team What we're looking for: 3+ years experience building web applications Expertise with building web applications and familiarity with both backend and frontend challenges Highly motivated to solve customer problems and drive user satisfaction Takes real ownership of their work and acts as a team player Experience with developing APIs and an understanding of databases Bonus points if you: Have built mobile-friendly progressive web applications or React Native applications Have familiarity with analytics products, CRM products, social media and/or marketing technology Have an interest in marketing, social media, e-commerce, or photo and video content creation Benefits and Perks Work-Life Balance Flexible work from home policy Generous paid leave and holidays to maintain a healthy work-life balance. Growth Personalized career planning sessions Mentorship program Visibility into operations across the company We are an equal opportunity employer and value diversity at our company. We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.
