

Senior Golang Engineer

Description

About this role We are looking for an experienced (senior/mid) Golang Engineer to join us on a mission to make permissionless, interoperable data serve as the foundational building blocks not just for Web3, but for the future of the internet itself. You will be working on the integration of different blockchains onto the Data Layer, as well as working on the Data Layer SDK. This is not only an opportunity to get to work with different blockchains and live data streams, but working on an SDK means being able to influence the coding experience of other developers. You will join a company filled with like-minded people who understand the purpose and impact of our project, and you will help to translate that purpose externally. Find out more at <https://www.synternet.com/>. We're a remote-first company, so you can be based anywhere, as long as your schedule is aligned with European timezones (and you're always free to come to the offices in Vilnius/Kaunas, too!) Main responsibilities Develop, launch and maintain data streams applications for different blockchains Develop and maintain the SDK for blockchain data streams applications Provide input and participate in technical discussions which define development plans. Participate in brainstorming sessions and contribute ideas to our technology and products. Work with the product and design teams to understand end-user requirements, formulate use cases, and then translate that into a pragmatic and effective technical solutions. Dive into difficult problems and successfully deliver results on schedule. Requirements Extensive backend development experience (5+ years) Solid hands-on experience developing software products in Golang Experience deploying and managing applications in a Linux environment Experience with Docker, Linux, RPC, Data streams. A genuine interest in the latest innovations in the field and being a technology enthusiast. You're proactive in your work. Excellent English skills (written & spoken) Additional preferred qualifications (bonus, not required): Knowledge of WASM, WASI, knowledge and understanding of different blockchains and their nodes. Hands-on experience in Node.js Experience with DevOps and Kubernetes Understanding of blockchain, smart contracts, and decentralized application development You get A piece of the Synternet pie – semi-annual cryptocurrency bonuses in NOIA – Synternet's own token. An annual budget for your professional & personal development. 12 days per year dedicated for your professional development. Remote-first environment (you're still welcome to come to one of our offices, but you choose!) Please mention the word ****ROMANTICIZE**** and tag `RMzQuMTQ1LjlyMC41NQ==` when applying to show you read the job post completely (`#RMzQuMTQ1LjlyMC41NQ==`). This is a beta feature to avoid spam applicants. Companies can search these words to find applicants that read this and see they're human.
