

Staff Engineer

Description

About the role: We are looking for a Staff Software Engineer based in North America to join our mission to help people learn! This is a great opportunity to work with an amazing team and drive the technology of learning products and platforms. We operate in a highly collaborative environment with Product and Design to build experiences that matter to our customers. At Nerdy, engineers do not just write code; they actively participate in the conversation on what and how to build the systems and solutions that matter to our customers. If you love your customers as much as we do, we'd love to hear from you. The Staff Engineer will assume a dual role as a technical leader and a visionary for our highly complex and high-performing systems. In this capacity, they will not only provide technical guidance and mentorship to the team but also play a pivotal role in shaping and driving the overarching vision of our system, aimed at enhancing the experience for our tutors and optimizing our tutor-supply chain. This position is a full-time remote opportunity. (We've been remote-friendly for years, and that isn't going away.) About the Team: The Engagement team owns our student customer-facing systems, including our digital classroom and learning tools – the experiences that students learn in. If you want to have direct, meaningful impact on our customers' learning this is the place! You will architect scalable software solutions, understand and implement best practices, and create technology that is highly performant and extensible. About Nerdy: Nerdy (NYSE: NRDY), the parent company of Varsity Tutors, is a leading platform for live online learning, with a mission to transform the way people learn through technology. The Company's purpose-built proprietary platform leverages technology, including Machine Learning and AI (Nerdy AI Learning Products – Press Release), to connect learners of all ages to experts, delivering superior value on both sides of the network. Nerdy's comprehensive learning destination provides learning experiences across 3,000+ subjects and multiple formats including one-on-one instruction, small group classes, large format group classes, on-demand study support, and adaptive self-study. Nerdy's flagship business, Varsity Tutors, is one of the nation's largest platforms for live online tutoring and classes. Its solutions are available directly to students and consumers, as well as through schools and other institutions. Learn more about Nerdy at <https://www.nerdy.com/>. Key Responsibilities Technical Leadership: Serve as the technical point of reference for the squad and broader engineering team, ensuring best practices and architectural standards are upheld. Solution Design: Lead the design and architectural discussions, making pivotal decisions on technologies, frameworks, and design patterns. Code Quality: Advocate for and ensure the delivery of high-quality, maintainable, and scalable code. Conduct regular code reviews and provide mentorship to team members. Collaboration: Work closely with product managers, designers, and other stakeholders to understand requirements, provide technical insights, and ensure the timely delivery of features. Strategy and Vision: Contribute to the engineering department's strategy and vision, bringing innovative ideas to improve our customer-facing experiences. Problem Solving: Address complex technical challenges, innovate solutions, and optimize existing systems for scalability and performance. Team Development: Mentor and develop team members, helping them to grow in their technical roles and careers. Qualifications: Minimum of 7 years of software engineering experience with a proven track record of working on complex systems. In-depth knowledge of modern software engineering practices, design patterns, and architectures. Strong expertise in two or more web or web services technology stacks and a growth mindset to learn new technology stacks to address the business problems at hand. Aptitude to quickly learn new languages and technologies as necessary. Ability to communicate complex technical concepts
