## New College Grad General Referral

### Description

The Emerging Talent team reviews referrals for new college grad software engineers, data scientists, and UX designers to join us in building and improving GoDaddy products. At GoDaddy, new college grads can make a meaningful contribution to the company's revenue, customer growth, and innovation. If you know someone who wants to make a difference and help our customers make their dreams a reality, please submit their general referral here! If a future relevant position opens up, an Emerging Talent recruiter will match them and begin the recruiting process. **Sponsorship:** Employment eligibility to work for GoDaddy is required as the company is not currently able to pursue visa sponsorship for this position. **Location Details:** At GoDaddy the future of work looks different for each team. Some teams work in the office full-time; others have a hybrid arrangement (they work remotely some days and in the office some days) and some work entirely remotely. This position may be a hybrid or fully remote position, as decided by your manager. If designated as hybrid, you'll divide your time between working remotely from your home and an office location, so you should live within commuting distance. If designated as remote, you'll be working remotely from your home and may occasionally visit a GoDaddy office to meet with your team for events or meetings. Your hiring manager can share more about this role's hybrid or remote designation. This position is not eligible to be performed in Alaska, Mississippi, North Dakota, or the Virgin Islands. **What you'll get to do...** Building outstanding services that help our internal and external customers succeed Writing highly scalable, highly-available, cloud-ready applications Solving end-to-end problems Testing code (e.g. writing functional and unit tests) Embracing Agile methodologies to continuously release and deploy iterations of our services Embracing DevOps methodologies for enabling and supporting always-on services Collaborate with customers and support agents to understand the needs of our customers. A strong understanding how you can assist our customers in accomplishing their goals every day. Establish critical metrics to monitor for product and customer success Demonstrate a positive demeanor and flexibility to work in a dynamic environment with changing needs Your experience should include... BS/MS in a computer science, information systems, UX Design, or equivalent in related discipline Strong experience in one programming language such as Java, Python, HTML, JavaScript, C#, Go Lang, etc. Strong foundation in data structures, algorithms, software designs, micro services, and cloud computing Prior work experience with AWS is a plus Demonstrates a passion to develop elegant and groundbreaking solutions for real-world business problems Experience in an Agile development environment is plus Strong analytical and research skills Excellent social, written, and verbal interpersonal skills. Strong writing skills with the ability to write clearly and quickly, to explain technical concepts to a non-technical audience Completed multiple academia projects that demonstrate a deep understanding of different technologies and tools Demonstrates a strong sense of curiosity and are always striving to improve their knowledge base We've got your back... We offer a range of benefits that may include paid time off, retirement savings (e.g., 401k, pension schemes), incentive eligibility, equity grants, participation in an employee stock purchase plan, and other family-friendly benefits including parental leave. GoDaddy's benefits vary based on individual role and location and can be reviewed in more detail during the interview process. We also embrace our diverse culture and offer a range of Employee Resource Groups (Culture). Have a side hustle? No problem. We love entrepreneurs! Most importantly, come as you are and make your own way. About us... GoDaddy is empowering everyday entrepreneurs
