Software Developer Test

Description

Founded in 2020, by Ayush Ranjan and Susmit Lavania – Huddle01 is on a mission to democratize digital connectivity by building the 1st DePIN for RTC(real-time communication), focused on data privacy, quality and community-driven scalability. The sustainable and efficient economic models behind this people-powered communication network will allow anyone & everyone with relevant capabilities to run and operate a Huddle01 Node and be the provider of minutes in our Network and get incentivized for the same. While apps, leveraging or built on top of our infrastructure, will consume the minutes provided by these Node operators. Till date, Huddle01 has raised $5.1M and its vision is backed by some of the leading funds including HiveMind, M31 Capital, Superscrypt, Protocol Labs, and angels like Balaji Srinivasan, Juan Benet, Sandeep Nailwal, and Dan Romero. Huddle01 is seeking a highly motivated and skilled QA Engineer to join our team. As a QA Engineer, you will play a key role in ensuring the quality of our software products by working closely with the development team. Key Responsibilities: Identify, report, and track defects to resolution in a timely manner. Conduct functional and regression testing to ensure the quality of our software products. Coordinate and conduct weekly releases, ensuring a smooth deployment process. Perform load and performance testing to assess system scalability and reliability. Write, execute, and maintain automated end-to-end tests, integration tests, and other types of automated tests to streamline the testing process. Collaborate closely with cross-functional teams, including developers and the product team, to improve quality and test coverage. Continuously research and evaluate new tools, technologies, and testing methodologies to enhance our testing process. Qualifications: 2+ years of experience in software quality assurance testing. Strong understanding of software testing methodologies, tools, and processes. Proficiency in tools such as Playwright, Vitest, k6. Experience in functional and release testing. Hands-on experience with load testing. Excellent problem-solving and debugging skills. Ability to work independently and as part of a team in a fast-paced environment. If you are passionate about technology and want to work in a dynamic and fast-paced environment, apply for this role today.
