Associate Core Consulting US

Description

About Coalfire Coalfire is on a mission to make the world a safer place by solving our clientsâ hardest cybersecurity challenges. We work at the cutting edge of technology to advise, assess, automate, and ultimately help companies navigate the ever-changing cybersecurity landscape. We are headquartered in Denver, Colorado with offices across the U.S. and U.K., and we support clients around the world. But thatâs not who we are â thatâs just what we do. We are thought leaders, consultants, and cybersecurity experts, but above all else, we are a team of passionate problem-solvers who are hungry to learn, grow, and make a difference. And weâre growing fast. Weâre looking for an Associate to support our Cloud Services team. This can be a remote position (must be located in the United States).Position SummaryAs a Cloud Services Associate, you will play a critical role in driving customer intimacy and growth by understanding our clientsâ businesses, industries, value propositions, and success requirements. Youâll leverage your expertise in gathering client requirements, working with technical teams on proposing solutions, and designing FedRAMP compliant cloud infrastructure. This is a great opportunity to join a dynamic team and make a meaningful impact for clients.nWhat You'll Do Assist in the coordination of large-scale cloud engagementsProvide both subject matter expertise and project management experience to serve as the âpoint personâ for engagement teamsParticipate in the design and operation of related compliance monitoring and improvement activities to ensure compliance both with internal security policies etc. and applicable laws and regulationsContribute to cloud program management, service delivery model and strategy planningDevelop and review reports and presentations for both technical and executive audiencesMonitor progress and manage risk while ensuring stakeholders are kept informed about progress and expected outcomesLeverage knowledge of industry trends to identify engagement and client service issues; communicate this information to the engagement team through written correspondence and verbal presentationsWork closely with engagement manager to co-lead and own multiple parts of the engagement deliveryDeliver quality client services. Drive high-quality work products within expected timeframes and on budgetEngage in development of client cloud and security strategies, vision-state architectures, roadmap, and planning activitiesEngage with clients to perform cloud configuration and maturity reviewsDocument requirements and ensure clear communication to the technical teamsAssist in designing FedRAMP compliant cloud infrastructure and solutions based on client requirementsTranslate client requirements to the engineering team for executionAdvise across a myriad of technology stacks in the leading cloud providers like AWS, Azure, and GCPWork with prospective clients to identify opportunities, scope engagements, and build relationshipsWhat You'll Bring 1+ years of directly relevant systems engineering and architecture experience including requirements definition, architecture development, development of use cases and stories, and systems integration & testHands-on experience with AWS, Azure or GCP platform capabilities and services (Associate Cloud Architect, Cloud DevOps Engineer, or Cloud Security Engineer)Critical thinking, and ability to balance security requirements with mission needsAbility to work quickly, efficiently and accurately in a dynamic and fluid environmentBS or above in related Information Technology field or equivalent combination of education and experienceExcellent communication, organizational, and problem-solving skillsBonus PointsPrevious experience supporting clients from within a professional services organizationProject management experience for individual and team projects(ability to track detailed tasks and ensure timely delivery)Cloud-based networking experience (Palo Alto, CheckPoint, Cisco ASAv, F5, etc….)Expertise with
