Fleet Engineering Project Manager Data Center

Description

About the role: As a Fleet Engineering Project Manager at CoreWeave, you will join a pivotal team within our Fleet Repair & Remediation organization. Acting as a team liaison for various internal and external stakeholders, you will ensure accurate and timely communication and alignment. Your responsibilities will include overseeing Returned Merchandise Authorization (RMA) generation, support, issue resolution, and generating performance metrics for both internal and external teams. Additionally, you will facilitate seamless communication across fleet engineering, data center technicians, and vendor teams. The ideal candidate will have a strong background in data center operations or similar physical logistics, experience with RMA processes, working with external vendors, and the ability to analyze, optimize, and operationalize both internal and external processes. Experience leading cross-team projects, working with planning, execution, and evaluation of project initiatives, including ticketing process improvements and optimization are assets for this role Wondering if youâ???re a good fit? We believe in investing in our people, and value candidates who can bring their own diversified experiences to our teams â?? even if you aren't a 100% skill or experience match. Here are a few qualities weâ??ve found compatible with our team. If some of this describes you, weâ??d love to talk. 3-5 years experience with physical IT infrastructure, Data Center operations and/or RMA of physical equipment with external vendors. Experience working with and developing ticket-based workflows and looking at issues and ticket data trends to help identify bottlenecks and areas for improvement. Familiar with tools and methods to create and maintain detailed documentation, and have proven experience in generating client-facing reports on infrastructure metrics, server management, and case workflows. Practiced in communicating with external vendors regarding business needs, priorities, incidents, and effectively resolving conflicts when they arise. Demonstrated execution ability and excellent communication skills. Ability to conduct regular project reviews and evaluations to assess effectiveness, identify areas for improvement, and drive continuous optimization. Robust problem-solving skills and adaptability in a fast-paced environment Our compensation reflects the cost of labor across several US geographic markets. The base pay for this position ranges from $120,000-$140,000. Pay is based on a number of factors including market location and may vary depending on job-related knowledge, skills, and experience. Hybrid Workplace Successful candidates will be expected to attend onboarding training at our NJ Headquarters within their first several weeks of employment, with subsequent quarterly travel requirements of 1 week duration. If you reside within a 30-mile radius of our New Jersey, New York, or Philadelphia offices, we're excited for you to join us at the office at least three times a week, recognizing the significance we place on fostering connections, collaboration, and creativity within our office culture. Our commitment to operating as a hybrid workplace underscores our dedication to enabling our employees to tailor their work-life balance to their individual preferences.Please mention the word **RECOVER** and tag RMzQuMTQ1LjIyMC41NQ== when applying to show you read the job post completely (#RMzQuMTQ1LjIyMC41NQ==).
