Product Manager Broker Research

Description

About AlphaSense: AlphaSense is a market intelligence and search platform used by the world's leading companies and financial institutions. Since 2011, our AI-based technology has helped professionals make smarter business decisions by delivering insights from an extensive universe of public and private content^{â??} including equity research, company filings, event transcripts, expert calls, news, trade journals, and clients^{â??} own research content. Headquartered in New York City, AlphaSense employs over 1,500+ people across offices in the U.S., U.K., Finland, Germany, India, and Singapore. For more information, please visit www.alpha-sense.com and check out the video clips. 1. The Decision that matters – 2. India Office – About the Team: The Content team is responsible for identifying, creating, licensing and integrating best-in-class unstructured and structured data that is both self-sourced and from third party content providers. The team reports to the Chief Content Officer and has strategy, product management and support responsibilities for each Content vertical. We have been experiencing a rapid growth cycle across all content sets, including the Broker Research team. We value and uphold transparency, trust and accountability in our relationships within the team and with external and internal stakeholders. About the Role: The Product Manager 1 ^{â??} Broker Research ^{â??} we seek must have a working knowledge of investment research, including its real-time and aftermarket business models, and the client use-cases for each. The primary focus of this role will be the integration of broker feeds and data into AlphaSense. As important will be the need to constantly analyze and enhance the feed integration process itself, either by process enhancements and / or by working with our agile scrum teams to enhance our workflow tools. This individual will also understand and have worked with various brokers and independent research providers and be capable of articulating a vision for research on AlphaSense to deliver a research experience that delights. Who you are: 5-7 years^{â??} experience in financial services with a specific focus on broker research. Content delivery experience using iterative / agile development methodologies. A proven track record of delivering content from initial engagement to release. Subject-matter expertise with content feeds, research metadata (RIXML), assorted document delivery types, entitlements, linkbacks, and usage tracking metrics for MiFID. Experience working with distributed teams. Existing relationships with numerous broker research departments and key third-party distribution vendors. Effective communication skills working with brokers and third-party content aggregators. Strong analytical skills and outstanding attention to detail. A superior ability to set priorities, stay focused and meet deadlines. Solid Excel/Word/PowerPoint and Google Sheets/Docs/Slides experience. B2B SaaS and/or enterprise software application company experience. What Youâ??ll Do: Take ownership of the full life cycle of research feed integrations, from definition to diligence to implementation, testing, and delivery. Working with other members of the broker research team, continuously analyze our feed integration processes to identify gaps and identify enhancements in our processes and / or our tools. Manage and maintain strong new and ongoing broker and independent research relationships with key decision makers, product and technology teams at individual broker and independent research firms. Project manage partnership initiatives with research providers. Create and manage a project roadmap by working with development teams to understand and optimize costs, benefits, and timelines for all aspects of implementation. Applying agile development methodology and working iteratively with engineers and various stakeholders to define scope and deliver features and improvements rapidly, while iterating to make improvements.
