

Software Team Lead

Description

About UsRevelator is a leading provider of business solutions for the music industry. Our all-inclusive music distribution platform, API, protocol, and web3 infrastructure, enhances efficiency in music distribution, financial reporting and simplifies royalty operations. We offer a wide range of services, including catalog management, supply chain, income tracking, rights management, and business intelligence. By leveraging our innovative solutions, music businesses can easily navigate the evolving landscape and capitalize on new opportunities. Responsibilities: Take engineering responsibility for a core area of Revelator's product. Manage a small team of developers (coach, direct, give feedback, code review, participate in hiring). Manage time estimation, prioritization, velocity and quality of development in accordance with Product Roadmap. Design, develop, and deploy high-quality, scalable, and secure .NET Core applications. Work side by side with Product Management and other stakeholders to analyze requirements, design technical solutions, and deliver robust software. Utilize Azure services to deploy and manage cloud-based applications. Develop, optimize, and maintain database solutions using MSSQL. Implement containerization and orchestration using Docker and Kubernetes. Leverage .NET Framework for legacy applications and ensure seamless integration with .NET Core solutions. Conduct code reviews and mentor junior developers to ensure best practices and maintain code quality. Troubleshoot and resolve complex technical issues independently, demonstrating strong problem-solving skills. Stay updated with emerging technologies, industry trends, and best practices to continuously improve development processes. Requirements: Bachelor's degree in Computer Science, Engineering, or related field. Proven team leadership experience. 5 years plus proven experience developing and deploying applications using .NET Core. Extensive knowledge of Azure services and cloud-based application development. Proficiency in designing and managing databases using MSSQL. Expertise in containerization and orchestration using Docker and Kubernetes. Strong familiarity with .NET Framework for seamless integration with legacy applications. Experience with messaging systems, particularly RabbitMQ. Excellent problem-solving skills and the ability to work independently. Strong teamwork and collaboration skills with the ability to lead and mentor junior developers. Exceptional communication skills, both written and verbal in English.
