

## Staff React Native Engineer

### Description

The Uniswap Labs team is building products to unlock value through universal exchange. We envision a future where digital economies flourish, and markets are transparent, global, and equitable. Our products — the Uniswap Interface, the Uniswap Mobile App, and the Uniswap Extension — are powered by the Uniswap Protocol. The protocol is the largest onchain marketplace, with billions of dollars in weekly volume across thousands of tokens on Ethereum and 8+ additional chains. When you join Uniswap, you become part of a team that's reshaping the way value flows on the internet. We're looking for an enthusiastic, self-motivated engineer to help us build the next generation of financial products. This role's primary focus will be on the Uniswap Wallet suite of products, which consists of mobile apps on iOS and Android as well as our new browser extension. Our products live in a monorepo and are built using React Native for Web to enable maximal code sharing between them. As a Staff Engineer at Uniswap, you will be expected to drive a large degree of impact by being involved in multiple key projects, exemplify engineering excellence, and be a strong source of mentorship for more junior engineers. You will be responsible for ensuring a consistent, high-quality user experience across these interfaces and will have the ability to influence the creation, design, and execution of future products and features. We are headquartered in SoHo in New York City and this role has the option to be partially or fully remote. Responsibilities

- Work across client, server, architecture, and infrastructure that powers our wallet products
- Take charge of driving strategic technical initiatives across engineering pods that impact the entire engineering organization
- Play a leading technical role in multiple large, impactful projects
- Rapidly implement functional UI elements from design mocks, with an eye toward performance and accessibility and ensure that components are functional, elegant, and performant
- Know when to create abstractions vs. one-off features
- Provide mentorship and feedback to other engineers on the team through both code and design doc reviews

Requirements

- 8+ years of software engineering experience
- A deep understanding of the architecture of modern client-side React Native applications
- Proven individual contributor or previously a Tech Lead with experience planning and leading end to end large projects with long-term impact on one or more systems or a team
- Familiarity with the web3 frontend stack (e.g., ethers.js, web3.js, viem)
- Experience with TypeScript
- Experience working fullstack
- A desire to keep up with modern best practices in web/mobile development
- Nice to Have
- Experience in native mobile (e.g., Swift, Kotlin)
- Experience with React Native for Web
- Degree in computer science
- Prior experience creating a design system or component library
- Love for unicorns

Minimum full-time salary of \$220,000-\$260,000. Disclosure in accordance with New York City's Pay Transparency Law. Full Time employees at Uniswap Labs are also eligible for other compensation elements, including equity, tokens, and benefits, dependent on the position type. Uniswap Labs' Full-Time employee benefits include company-paid medical, dental, & vision for you and your dependents, gym subsidy, 401(k) participation, annual \$1,500 education stipend, unlimited and encouraged time off, up to 16 weeks paid parental leave, home office setup stipend for remote employees and daily lunches at NY headquarters (all benefits are subject to applicable taxes and based on eligibility). Uniswap Labs is committed to diversity in our workforce and is proud to be an Equal Opportunity Employer (EEO). We provide employment opportunities without regard to age, race, color, ancestry, national origin, religion, disability (including gender dysphoria and similar gender-related conditions), sex, gender identity or expression, sexual orientation (including actual or perceived heterosexuality, homosexuality, bisexuality, and asexuality), veteran status, military status, domestic violence victim status, reproductive health decision
