Product Manager Observability

Description

Product Manager – Observability Logs Elastic is The Search AI company that enables everyone to find the answers that matter. From all data. In real time. From finding documents to monitoring application performance to hunting for threats, Elastic makes data usable in real-time and at scale! Thousands of organizations worldwide, including Barclays, Cisco, eBay, Fairfax, ING, Goldman Sachs, Microsoft, The Mayo Clinic, NASA, The New York Times, Wikipedia, and Verizon, use Elastic to power mission-critical systems. Founded in 2012, Elastic is a distributed company with Elasticians around the globe. Learn more at elastic.co. Weâ??re eager to welcome a stellar Product Manager to join the Elastic Observability product team, to work on initiatives ranging from logs and analytics to alerting and beyond. From ensuring all logs are successfully collected and ingested, to applying the right alerting and analytics techniques to extract maximum value for our customers, this role contributes heavily to the success of the Observability product! What you will be doing: Defining and steering the roadmap to drive Observability, aligning at every step with organizational and company strategy. Working closely with Engineering, UX, Design and other teams to execute on your roadmap to bring top notch experiences to our users. Working with our Sales & Marketing teams on go-to-market, messaging, competitive analysis, enablement, and feature adoption. Tracking user engagement and feedback to inform product evolution. What you bring along: 1+ years in product management or closely related area Observability or performance monitoring domain knowledge, with a keen sense of log data traits, analytics, and/or alerting Comfort working with and converting abstract problems into concrete, prioritized solutions, working from the customer backwards Top-notch spoken and written communication skills Passion for industry trends, competitive landscape Ability to lead and collaborate effectively Bonus points: Experience working in remote, globally distributed work environment Knowledge of open-source software Please mention the word **CONSTRUCTIVE** and tag RMjE2LjI0NS4yMjEuOTE= when applying to show you read the job post completely (#RMjE2LjI0NS4yMjEuOTE=).
