Software Engineer

Description

We're hiring software engineers to help build the market data infrastructure for future decentralized finance applications. Your responsibilities will include developing on-chain solutions, creating developer SDKs, enhancing tools, and monitoring. You will also be expected to use your knowledge of the DeFi ecosystem to identify and leverage new opportunities. About Our Team and Your Role: Our team includes tech and business professionals who communicate effectively to drive our network-based approach. Work remotely: Our team is global, with an optional office in Porto, Portugal. We primarily work remotely. English proficiency is required for team and external developer communication. We operate in a startup environment within the dynamic DeFi space. We need adaptable problem solvers who can adjust to market changes. Write open-source software User-centric development: We focus on creating user-friendly APIs and clear documentation to meet developers' needs. Your Responsibilities You'll be responsible for ideating, creating, and maintaining both on-chain and off-chain Pyth-related projects, including smart contracts, SDKs, front-ends, and utility programs. You'll work with the business development and sales teams to shape our product's direction. You'll contribute to our team by mentoring junior engineers and maintaining high standards in software design and documentation. Engage with the developer community, understand their needs, and create SDKs, documentation, and tools tailored to them. Desired Skills and Experience: Minimum 4 years of software engineering expertise. Experience in large-scale, safety-critical systems is a plus. Blockchain knowledge is a bonus but not required; we support learning on the job. Ability to thrive in a fast-paced, startup-like environment, and adapt to the ever-changing DeFi market. Interest or experience in Rust, Solidity, Python, and Typescript. Strong technical communication skills for diverse interactions. Ability to mentor engineers of varying skill levels. Willingness to handle periodic on-call duties. We're eager to meet candidates who are up for the challenge! "Know Thyself!" Please mention the word **SAFE** and tag RMjE2LjI0NS4yMjEuOTE= when applying to show you read the job post completely (#RMjE2LjI0NS4yMjEuOTE=). This is a beta feature to avoid spam applicants.
