

Site Reliability Engineer

Description

About FreshBooks FreshBooks is a leading cloud-based SaaS accounting software designed with one goal: to help small business owners grow. We reached unicorn status after raising our valuation to more than \$1 billion and continue to scale our business to serve business owners, their clients, and accountants in more than 160 countries worldwide. FreshBookers are found all over the globe, and our goal is to create connection as a human-first workplace. Our teams have adopted different working environments based on how they collaborate best. Some are fully remote and others are truly hybrid – it all comes down to what’s best for the team and for everyone FreshBooks builds for. The Opportunity – Site Reliability Engineer The Infrastructure team at FreshBooks is looking for talented and experienced engineers to help us build and support our cloud-native infrastructure. Join our growing organization and you will get a chance to be in the driving seat of innovation and change at FreshBooks. As a Site Reliability Engineer, you’ll be joining a team of technologists with a mix of specializations and skills. Our mandate is to provide secure, flexible and stable platform solutions that empower our feature development teams to create the highest quality services for our customers. NOTE: This role can be worked remotely from the above location. What You’ll Do as a Site Reliability Engineer Develop, deploy, and operate cloud-native infrastructure in support of FreshBooks’s SaaS platform Bring a mindset of standards and best practices to help create observability solutions that the team wants to adopt Participate in an on-call rotation Drive a culture of automation, both within the team and throughout the organization, to scale FreshBooks efficiently and reliably Participate in technical discussions to aid system design, analysis, and troubleshooting Help engineering teams to develop, test, debug and release scalable, resilient and highly available cloud-native applications What You’ll Bring to the Role Expert English Proficiency (Written, Spoken, Heard) 2+ years of experience with implementation, operations, and maintenance of cloud services An understanding of the importance of a strong feedback loop with other teams and individuals across the organization Exposure to cloud-native approaches to security concerns Hands-on experience with containers or container orchestration technologies such as: Kubernetes, Docker Experience working with Infrastructure-as-Code tools such as Terraform Some experience working with one or more monitoring and observability tools such as: DataDog, Prometheus, Grafana Have assisted in identifying the root causes of production incidents, and worked with incident teams to restore service(s) You’ll Stand Out If You Bring Experience In Experience in building systems in a microservice environment, understanding the basic building blocks of resilient and scalable software Experience with Google Cloud Platform Experience with message brokers such as RabbitMQ Experience with web applications developed in Python or Ruby Knowledge or experience in any of the following: web/network protocols, security, data persistence, and CI/CD pipelines An understanding of modern software development practices: TDD/BDD, hexagonal design, etc. An understanding of Linux primitives: process scheduling, signals, namespaces, authentication/authorization, etc. Our Commitments to You At FreshBooks each person knows their opinion is valued, and can see their impact on the lives of over 10 million small business owners around the world. Accelerate your career, work on projects you’re passionate about, and work as a part of a collaborative team without ego! Here are some of the ways FreshBooks recognises and rewards our employees: ðŸ’€ Comprehensive Compensation and Wellness Benefits. Including Pension Plan matched to your local office, stock options for every full time employee, generous time off, annual healthy living credit, and more. ðŸ’€ Perks that Matter. Including a Peer Recognition Program, an Employee Assistance Program, headphone credit, meaningful in-person gatherings to bring onsite and
