

Senior UX Designer

Description

Location Our Senior UX Designer will be an integral part of our UX and Design team in EMEA. This role is based remotely, and will sit ideally in or around the UK, Ireland or Spain. **Who We Are** DoiT is a global multi-cloud innovator that helps simplify the most important cloud challenges. Our vision is to deliver the true promise of the cloud by making it more accessible and transformative. Our mission is to help cloud-driven organizations understand and harness the cloud to drive business growth. We do this by providing intelligent and continuous engagement with unrivaled cloud expertise to buy, optimize, and manage the cloud with ease. With almost 2,500 years of collective cloud operations experience and \$1.7B in cloud spend under management. An award-winning strategic partner of Google Cloud and AWS; DoiT works alongside our 3,000+ customers to save them time and money. **The Opportunity** As Senior UX Designer, you will have key decision making responsibilities and be given the autonomy to ensure the DoiT Console is built upon user-centered best practices. This role is ideal for someone who takes a customer-centric view to design problems and can deliver high-quality UX work in a fast-paced and open environment. **Responsibilities** Develop deep contextual understanding of the public cloud, our business, our users, and their needs Own a broad set of features with a focus on improving customer adoption and product stickiness Produce sketches, workflow diagrams and hi-fidelity prototypes using Figma and FigJam Produce high-quality design output with a razor sharp focus on business and customer value Take a leading role in our user research efforts and conduct regular usability studies and customer interviews Collaborate with Product Managers, Designers and Engineers Join the design team in weekly design critiques, operations meetings and knowledge sharing sessions Contribute towards the DoiT design system **Requirements** BA or BS in UX Design or relevant professional experience 8+ years of experience in the design industry Experience solving complex product problems Expertise in user-centered design principles and methodologies A strong portfolio demonstrating both UX and UI design skills Experience using Figma, Figjam, Jira and Confluence Be a self-starter who can manage multiple deliverables simultaneously Outstanding verbal/written communication skills and experience interfacing with a multitude of stakeholders Experience working in the public cloud would be a bonus **Are you a DoiT'er?** Be your truest self. Work on your terms. Make a difference. We are home to a global team of incredible talent who work remotely and have the flexibility to have a schedule that balances your work and home life. We embrace and support leveling up your skills professionally and personally. What does being a DoiT'er mean? We're all about being entrepreneurial, pursuing knowledge and having fun!
