Software Engineer II Backend

Description

About Life360 Life360â??s mission is to keep people close to the ones they love. Our category-leading mobile app and Tile tracking devices empower members to protect the people, pets, and things they care about most with a range of services, including location sharing, safe driver reports, and crash detection with emergency dispatch. Life360 serves approximately 66 million monthly active users (MAU) across more than 150 countries. Life360 delivers peace of mind and enhances everyday family life with seamless coordination for all the moments that matter, big and small. By continuing to innovate and deliver for our customers, we have become a household name and the must-have mobile-based membership for families (and those friends that basically are family). Life360 has more than 500 (and growing!) remote-first employees. For more information, please visit life360.com. Life360 is a Remote First company, which means a remote work environment will be the primary experience for all employees. All positions, unless otherwise specified, can be performed remotely (within the US and Canada) regardless of any specified location above. About The Team The Horizons Cloud Engineering team is responsible for defining, building, and supporting the foundational cloud services that all developers at Life360 depend on. This team consists of some of the most senior and trusted engineers at Life360 who are constantly thinking about scale and performance and how it will impact the millions of customers and families that depend on our services. If you are looking to multiply your output, this is your team. About the Job Youâ??ll be working with a close-knit backend team of Cloud, PHP, Java, and Python engineers, all working closely to provide a best-in-class platform for developers to use. This team works closely with our Staff engineers and other teams at Life360 to ensure solutions will perform at scale. For candidates based in the US, the salary range for this position is 115,000 to 150,000 USD. For candidates based out of Canada, the salary range for this position is 125,000 to 145,000 CAD. We take into consideration an individual's background and experience in determining final salary- therefore, base pay offered may vary considerably depending on geographic location, job-related knowledge, skills, and experience. The compensation package includes a wide range of medical, dental, vision, financial, and other benefits, as well as equity. What Youâ??ll Do Work with other engineers to implement best-steps to decouple PHP monolith services into new Java microservices Horizontally scale our PHP platform to handle another 10+ billion events per day Work cross-functionally across teams to gain alignment on your or team's initiatives Monitor health, suggest/drive improvements for, and deploy your own services Maintain and improve service level objectives (SLOs) Collaborate closely with Senior engineers to build technical specs Help our Test Engineering team to further automate services and component validation Create and update automation suites to enable improved automation What Weâ??re Looking For Bachelorâ??s degree in computer science or similar quantitative field or the equivalent industry experience 2+ years experience with Java/Spring Boot 1+ years experience with relational or non-relational databases such as MySQL, Postgres, DynamoDB, MongoDB, Cassandra, etc Understand microservices and their architectures Understand how to deploy and maintain systems, ideally with Kubernetes Communicates effectively with cross-platform teammates Preferred Qualifications 2+ years experience with Java (bonus for Spring Framework experience), Python, PHP, CakePHP, and queuing/stream technologies such as Kafka and NSQ Adaptive to working across programming languages regularly Experience working remotely, with minimal guidance Experience working with AWS products Experience with Docker, Kubernetes Our Benefits Competitive pay and benefits Medical, dental, vision, life and disability insurance plans (100% paid for US employees).
