

QA Automation Engineer Berlin

Description

Get to know us At eyeo, we transform the internet into a trusted, sustainable and accessible place where users regain control over their experience, content creators and publishers are rewarded for their content, and advertisers and consumers can connect on mutually agreed terms. eyeo's market-leading ad-filtering technology powers products like Adblock Plus and AdBlock as well as technical integrations for popular browsers. Our solutions empower users to control their online experience and privacy, while providing monetization for content creators, publishers and advertisers. In combining our partnerships and our subsidiary products, our technology reaches 350 million monthly active users worldwide. eyeo is a global employer of over 300 people working remotely in more than 30 countries (predominantly North America and Europe) with our HQ in Berlin and small offices in Cologne, Toronto and NYC (planned soon). How we work eyeo has colleagues based all over the world. We love our diversity and take great pride in our company culture. We practice an independent, remote workstyle with work distributed in cross-functional matrix teams that span predominantly EST and CET time zones. If working remotely isn't for you, we also have a large office in Berlin and soon in NYC that you can choose to work from. We meet twice a year as a team and once a year, we host an all-company retreat, our Summer Week. By enabling remote work and in-person sessions, we have built a hybrid culture that provides a unique dynamic of flexibility and belonging. What you'll do In this role, you will join a team of dedicated engineers working to extend ad filtering capabilities beyond the browser, enhancing user experiences on various platforms. If you are passionate about tackling complex challenges, thrive in a fast-paced, iterative environment, and excel at breaking down intricate problems, we believe you'll be a great fit. You will continuously strive to increase the quality of our products through test automation, continuous integration (CI) improvements, internal tooling, documentation, and more. Additionally, you will perform manual testing as needed during releases to ensure all relevant functionalities are in place. Your day-to-day activities: Help maintain testing environments required for team projects Strategize and develop reliable automated test cases for such an environment Identify and migrate manual processes to automated ones, especially with CI/CD in mind Ensure created tooling and processes are well-documented Enable and encourage other developers and QA engineers to design and implement tests efficiently by providing them with the right tools and frameworks Foster open communication and close collaboration with other members of the business unit, to strengthen the teams and increase overall productivity What you bring to the table Intermediate or senior level proficiency with software testing and quality assurance on mobile platforms Knowledge of basic web technologies (HTML, CSS, JavaScript) Knowledge of a scripting language, like Python Familiarity with device testing services like Firebase test lab, AWS Device Farm, Browserstack or TestObject Experience with testing frameworks like Appium, Espresso, Selendroid, Calabash Knowledge of the Git version control system Demonstrate the ability to work autonomously, efficiently achieving results with minimal supervision and without the need for detailed instructions or structured goals. Familiarity with agile frameworks (Scrum, Kanban, etc) Excellent communication skills in English Experience maintaining clear, concise documentation for internal processes and system architectures It's awesome if you have Knowledge of network protocols (DNS, HTTPS, DHCP, TCP) , proxy servers, VPN, firewall Familiarity with common cloud-computing platform components. On AWS, for example, it would be EC2, CloudWatch, S3, etc. Knowledge of additional programming languages Experience collaborating as part of a remote team What we offer Work remotely or from one of our offices â?¶ we trust you to find what works best for you Full package of benefits (health insurance,
