

## Finance & Accounting Analyst

### Description

The Finance & Accounting Analyst Role This role is a critical asset to our Finance team, tasked with operationalizing and executing our thoughtful financial strategy. We are searching for a self-starter and detail-oriented leader to support robust and accurate processes for our core finance activities. You will manage AP/AR, expenses, financial reporting, and tax preparation, among other key reporting tasks that drive accountability across teams. You will also lead and ensure adherence to the organization-wide financial budget, tracking spending, reporting, and managing our team's spending policies on a monthly basis. In this role, you will operate in an autonomous yet cross-functional environment, leveraging your sharp analytical mindset and tenacious problem-solving abilities. The ideal candidate is adept at navigating ambiguity, asking the right questions, interpreting data, and delivering accurate financial predictions. What You Will Do Maintain and improve all accounting and financial processes that support the Company's overall business objectives. Reliably manage our accounts payable and accounts receivable while also supporting other accounting tasks Drive monthly reporting efforts, like investor quarterly reports or financial budget forecasts, to build storylines and custom analyses that support our critical engagements. Identify opportunities to leverage technology to enhance the efficiency and accuracy of the Company's financial processes. Provide strong accounting, finance, and business analytical skills to independently drive financial and operational excellence Build trusted relationships with department heads, customers, vendors, etc. with a service-oriented mindset. About You Bachelor's degree in finance, accounting, economics, or similar fields 3-6 years of experience in finance / accounting, with a focus on financial operations Exemplary history of financial project management and strong data visualization skills You have a passion for developing strong financial workflows and policies You genuinely enjoy dissecting problems and diligently searching for errors with a fine-tooth comb You have an appetite for automation and create a smoother, error-free workflow to optimize the financial engine Experience working in early-stage startups is a plus Located in the United States; preferably in San Francisco Bay Area Salary Range: \$86,000 – \$125,000 Annually + Benefits + Equity (if applicable) + Bonus (if applicable) Actual compensation is influenced by a wide array of factors including but not limited to skill set, level of experience, certifications or licenses, and specific work location. Information on the benefits offered is here.
