

Software Engineer AI

Description

Mission: Join Opaque as a Senior Software Engineer specializing in AI, where you will lead our cutting-edge initiatives in Generative AI. In this role, you will directly impact our product innovations and enhance user delight by developing AI-driven solutions. Your expertise in the latest AI technologies will help us stay ahead of the curve and deliver exceptional value to our customers. Key Responsibilities: Design, prototype, and deploy scalable AI solutions. Lead AI knowledge sharing sessions to elevate our team's expertise and integrate state-of-the-art AI practices into our projects. Manage project scopes, create detailed timelines, and ensure the timely delivery of AI functionalities. Foster cross-functional collaboration to align AI initiatives with company-wide goals and improve product integration. What We're Looking For: Proven track record of rapid prototyping and innovation in AI projects. Hands-on experience with large language models and their ecosystems, including TensorFlow or PyTorch. Expertise in data structures, algorithms, and system design with a focus on security and scalability. Proficiency in Linux, Kubernetes, and developing/maintaining enterprise-level software. Ability to quickly learn new technologies and apply them effectively. Nice to have: previous experience in stakeholder engagement and handling external partnerships.
