

## Software Developer Licensing Team

### Description

Who We Are; What We Do; Where Weâ€™re GoingMagnet Forensics is a global leader in the development of digital investigative software that acquires, analyzes and shares evidence from computers, smartphones, tablets and other IoT related devices. We are continually innovating so that our customers can deploy advanced and effective tools to protect their companies, communities and countries. Earlier this year, we shared the exciting news that Grayshift and Magnet Forensics have come together as one organization to accelerate innovation and transform digital investigations for our customers. Weâ€™re pleased to share that the combined organization is operating as Magnet Forensics! The combination of mobile, cloud, and computer forensics expertise under the Magnet Forensics name underscores our dedication to providing comprehensive, end-to-end DIFR solutions. This includes our commitment to helping with access to modern digital devices lawfully with our renowned product suite. And, our focus on innovating for the DFIR community, along with our shared mission, continues to be the top priority! Magnet is continuing to expand and grow. Where we are today, is not where we will be tomorrow.

**Your Team** Theâ€™Engineeringâ€™teamâ€™is focused onâ€™producing softwareâ€™that solvesâ€™the most important problemsâ€™facingâ€™digital forensicsâ€™professionals today.â€™Our algorithmsâ€™make sense of data that is oftenâ€™hidden, corrupted, or incomplete.â€™We write fast code and build intuitive UIs because we know that minutes can make a differenceâ€™in national terrorism cases and life-or-death situations.â€™We are aâ€™communityâ€™ofâ€™smart,â€™passionate, humble people whoâ€™recognize that solvingâ€™the industryâ€™sâ€™toughestâ€™problemsâ€™requiresâ€™constant collaboration,â€™continuousâ€™learning, andâ€™frequent doses ofâ€™humourâ€™â€™come prepared for emojis, GIFs, andâ€™questionableâ€™Photoshopâ€™skills.

**A Software Developer on the Licensing team** contributes to initiatives to enable our Product Engineering teams to license their software and for Order Ops to deliver software/licenses to our customers. Weâ€™re looking for someone with a desire to make a difference, strong problem-solving skills, and a curious mind to deliver a great digital forensics experience to our customers!

**What You Will Accomplish**Design and implement new Licensing features, supporting products such as AXIOM and AXIOM CyberContinuous improvement on existing features Take ownership over the quality of the code you produce â€™write clean and testable codeCollaborate with your direct team members as well as the broader engineering organization to drive innovation Adapt to changes as they arise from business & customer needs Be an active team member with fellow talented developers and software testers Accountable and take ownership of your projects Supported investment in your learning & professional development

**What We Are Looking For**Weâ€™re looking for someone who checks off most, but not all, of the boxes listed in â€™skills and experiencesâ€™. Itâ€™s more important to us to find candidates who can display indicators of success through skills they have developed and experiences they have been a part of, than to find folks who have â€™been there, done thatâ€™. We want to be part of your development journey, and weâ€™ll learn as much from you as you learn from us.

**There are a couple must haves, but we will keep that list short:** You have post-secondary education in software engineering, computer or electrical engineering, computer science, math, or related field 4 years plus proven experience as a Software Engineer or in a similar role, demonstrating hands-on experience in software development Strong knowledge of object-oriented programming languages, preferably C#Strong knowledge of .NET FrameworkCurious and have a proven ability to learn quickly Ability to contribute to technical discussions with peers and stakeholdersExcellent problem-solving and
