Senior Java Software Architect

Description

WHO WE AREThe Trustly Americas team combines PayWithMyBank, a 2012 Silicon Valley startup, with Trustly AB of Sweden, following their 2019 merger. Our team represents 30 nationalities, serving 8,300 merchants, connecting to 650 million consumers, and 12,000 banks across 33 countries. Our global network processes over $42 billion annually.Our digital account-to-account platform redefines the speed, simplicity, and security of payments. Consumers pay for purchases by simply signing into their bank accounts, bypassing the card networks, and never leaving a merchantâ[][]s site or app â[][] no credit card numbers or separate account setup necessary. With offices in Vitoria, Brazil, Silicon Valley in the US, and global headquarters in Stockholm, Sweden, we are a culturally diverse team. Across Brazil, we have embraced remote work from home policy.At Trustly, we believe that inclusion and diversity are essential foundations for building a fair and equitable society. We do not discriminate based on race, religion, ancestry, color, national origin, gender identity, sexual orientation, age, citizenship, marital status, or disability status. Our main goal is to provide a fair, welcoming, diverse environment with opportunities for all collaborators. The stages of our selection process take place online and without distinction of any kind.Itâ[][]s a great time to join Trustly as the Americas team is growing fast. If you thrive in an entrepreneurially-minded, fast-paced, casual, professional, positive, and rewarding work environment, check us out!About the team: Join our dynamic software architecture team, where collaboration is key. Working hand-in-hand with product managers, engineering leads, and skilled software engineers, we're committed to developing, deploying, and managing a cutting-edge product suite grounded in cloud-native microservices. As a Software Architect, you'll play a pivotal role in shaping our architecture, guiding software engineers and data scientists as we expand, refine, and transition services to a unified platform for payments and risk analysis. Your influence will be profound, steering our organizational growth and shaping our evolution towards an optimally functioning, cloud-based service. Your expertise will also be instrumental in integrating with external service providers, adhering to industry best practices, and scaling Trustly's platform to meet our rapidly increasing demands. Come make a difference and thrive with a team that's leading the way!nWhat you'll do:Lead the architectural vision for our cloud-based services, impacting the company's strategic direction.Collaborate closely with product managers, engineers, and data scientists to enhance our platform.Integrate our services seamlessly with external providers while adhering to top industry standards.Spearhead the development and implementation of high-quality, scalable Java-based solutions.Foster an environment of technical excellence, guiding teams in best practices, code quality, and test automation.Who you are: Solid experience in backend Java development and greater experience in a Java Solution Architect role.Technical Expertise: Deep knowledge of Java and its frameworks, particularly Spring. Proficiency in API development, cloud deployment (AWS, Azure, GCP), and virtualization technologies.Solid experience with networking protocols and test automation in Java environments.Leadership Skills: Proven track record in team leadership and mentorship, with strong problem-solving and communication abilities.Education: Bachelorâ[][]s or Masterâ[][]s degree in Computer Science, Engineering, or related field.Advanced English. Our perks and benefits:Bradesco health and dental plan, for you and your dependents, with no co-payment cost;Life insurance with differentiated coverage;Meal voucher and supermarket voucher;Home Office Allowance;Wellhub – Platform that gives access to spaces for physical activities and online classes;Trustly Club – Discount at educational institutions and partner stores;English Program – Online group classes with a private teacher;Extended maternity and paternity leave;Birthday Off;Flexible
