Description

A little about us: 3MotionAI is a human motion analysis and training platform leveraging mobile devices to evaluate how people function – mentally and physically. We deliver clinical-grade assessments of movement biomechanics and neuromuscular function through proprietary 3D Neural Networks and clinically validated cognitive-motor integration applications. Backed by over 15 years of published data and rigorous validation, 3MotionAI brings accurate and actionable data to every mobile device to help people optimize their physical and mental performance. 3MotionAI empowers everyone with the knowledge to answer the question: "Am I performing at my best at home, work, or play?"Â POSITION OVERVIEW: We are seeking a skilled DevOps Engineer with expertise in Azure, GitHub, and Google Cloud Platform (GCP) to join our dynamic team. The ideal candidate will be responsible for designing, implementing, and maintaining our CI/CD pipelines and cloud infrastructure. In addition, the role may require providing backend development support (ASP.net, Python, and Golang) as needed. The ideal candidate should have a startup mentality and be able to work effectively in a fast-paced, collaborative environment.Â AREAS OF RESPONSIBILITY:Â CI/CD Pipeline & Automation:Â Design, implement, and manage CI/CD pipelines using Azure DevOps and GitHub ActionsÂ Automate the deployment process to ensure smooth and efficient releasesÂ Monitor and troubleshoot pipeline issues to ensure high availability and performanceÂ Cloud Infrastructure:Â Design, deploy, and manage cloud infrastructure on Azure and GCPÂ Ensure scalability, reliability, and security of cloud resourcesÂ Implement best practices for cloud architecture and cost optimizationÂ Monitoring & Telemetry:Â Implement and maintain monitoring and alerting systems to ensure system health and performanceÂ Respond to incidents, perform root cause analysis, and implement corrective actionsÂ Maintain and update incident response plans and proceduresÂ Â Â QUALIFICATIONS:Â Bachelorâ s degree in Computer Science, Information Technology, related field, or equivalent experienceÂ Proven experience (typically 3+ years) as a DevOps Engineer or in a similar roleÂ Expertise in using git, Github, Azure, Azure Devops, & GCPÂ Experience with containerization and orchestration tools like Docker and KubernetesÂ Solid understanding of networking, security, and system administration.Â Strong coding skills in at least one language (e.g., ASP.net, Golang, Python)Â Experience with monitoring and logging tools (e.g., Prometheus, Grafana, ELK Stack)Â Excellent problem-solving skills and attention to detailÂ Ability to work effectively in a fast-paced, collaborative environmentÂ Strong communication skillsÂ Location: Remote or Hybrid/Local to the Greater Toronto AreaÂ Benefits:Â Competitive salaryÂ Comprehensive benefits packageÂ Opportunities for professional development and growthÂ To apply for the DevOps Engineer position, please send your resume to hr@3motionai.com with the subject line DevOps Engineer.Â Please mention the word **STEADFAST** and tag RNDQuMjMzLjExNi41Nw== when applying to show you read the job post completely (#RNDQuMjMzLjExNi41Nw==).
