Rust Developer &Nbsp;Holochain

Description

Full time – contract(Full Time – 100% Remote Work) Time Zone: CET TO ET (EU to Eastern USA) Language: English Fluency This opportunity is in a rapidly growing, disruptive global tech startup. We are looking for a developer to join our Holochain core team. What will you do: What are we looking for? You should have a passion for building cutting-edge products and an orientation to winning as a team. Weâ��re looking for someone who has deep experience building applications using Rust or similar strongly typed languages. You should be able to develop solutions independently and with distributed teams, using modern software development and agile methodologies. The perfect candidate will have modern development experience and build strategies that include continuous integration, test-driven development, Nix language, and package manager language. What you will do: Write reusable, testable and efficient code for Holochain. Work on CI (GitHub Actions), Nix and decentralized test tooling. Participate in an agile development cycle where we all take responsibility as a team and act independently. Work with app developers to help them build on Holochain. Maintain and improve existing software. Participate in best practices for documentation and agile processes. Skills: Rust/Go/C/C++ experience or similar systems programming experience – 4-6 years. Experience automating builds and workflows with CI frameworks and tools, including Github Actions. Familiarity with the Nix language, flakes, package management and reproducible builds. Proactive and direct communication is a must. Knowledge and regular application of secure coding practices. Experience with async and multi-threaded programming. Experience with cross-platform development: Linux, Windows, MacOs, Mobile, etc. Nice-to-have – Understanding of cryptographic and Peer-to-Peer technology. Experience working on and contributing to open source projects – Nice-to-have. Nice-to-have – Startup experience. Some details about what we offer: Market salary (National Currency) Supportive introductory period Regular team meetings (remote/video) Collaborative culture that lives from self-motivation Self-directed and self-generative Flexible work schedules and vacation Motivated, passionately engaged and evolutionary global teammates About us Holochain is an open-source framework for distributed peer-to-peer applications. It is fast, massively scalable, cost-effective, resource-efficient, and energy-efficient. Holo, which is built on Holochain, is a distributed cloud platform and marketplace for hosting and serving other Holochain applications to everyday users connected to the Internet. Holo brings access to distributed applications to the familiar web browser by creating an ecosystem and a currency that enables distributed hosting services provided by peers. With Holo, we envision a world where people own their own data and control their identity and privacy, a world where communities create together with patterns and tech designed to maximise individual, social and environmental well-being. Our aim is to make distributed peer-to-peer computing accessible to everyone. Apply Now!
