Software QA Automation Engineer

Description

About AppDirectBecome a digital, global citizen and enable the new generation of digital entrepreneurs around the world. AppDirect offers a subscription commerce platform to sell any product, through any channel, on any device – as a service. We power millions of subscriptions worldwide for organizations. We do this by our values-driven cultureâ??one that enables you to Be Seen, Be Yourself, and Do Your Best Work.About YouWe are rapidly expanding and looking to hire talented and ambitious software engineering talent in Buenos Aires. As a member of the team, you will create, grow, and manage a distributed network of marketplaces and applications. We love entrepreneurial spirit and those who bring experience from established organizations. You are a highly technical, hands-on developer with a passion for producing maintainable and robust code. You will design and develop well-tested software, build mission critical services, and APIs that scale with our increasingly elegant set of features. Our teams are distributed among several countries so clear communication What you'll do and how you'll have an impact Represent the interests of users and customers through the relentless pursuit of a quality product Document issues and bugs; relentlessly move each bug through its life cycle Design and create manual tests in a TCM tool like TestRail Test automation for REST APIs using RestAssure and Java Contract test automation using Pact.io Performance testing using JMeter or Gatling Automate mundane tasks and build meaningful dashboards for the team to promote efficiency Collaborate with developers, QA team, product managers, partners, and consultants to deliver the highest quality with each release Consistently raise the bar of what exceptional quality looks like by researching and promoting improved QA practices for the team What we're looking for 2-4 years of experience with manual and automation testing Bachelor's degree in Computer Science or a related technical field Proficiency in JavaScript/TypeScript and Cypress Experience in performance and load testing with K6 API testing with Java and RestAssured Familiarity with Docker Knowledge of Jenkins Experience with incident management tools like Jira Experience with version control systems like GitHub At AppDirect, we believe that innovation thrives in an environment that houses diversity of excellence, experience and thought. We respect each AppDirector as their own fingerprint; unique with no one alike. We foster an environment of inclusion without regard to race, religion, age, sexual orientation, or gender identity enabling AppDirectors to embrace their uniqueness to do their best work. As such, we strongly encourage applications from Indigenous peoples, racialized people, people with disabilities, people from gender and sexually diverse communities, and/or people with intersectional identities.At AppDirect we take privacy very seriously. For more information about our use and handling of personal data from job applicants, please read our Candidate Privacy Policy. For more information of our general privacy practices, please see AppDirect Privacy Notice: https://www.appdirect.com/about/privacy-noticePlease mention the word **HAPPY** and tag RMzUuOTQuMTg0LjIwMg== when applying to show you read the job post completely (#RMzUuOTQuMTg0LjIwMg==). This is a beta feature to avoid spam applicants. Companies can search these words to find applicants that read this and see they're human.
