

Director Senior Director of Field Medical Affairs

Description

Scholar Rock is a biopharmaceutical company that discovers, develops, and delivers life-changing therapies for people with serious diseases that have high unmet need. As a global leader in the biology of the transforming growth factor beta (TGF β ²) superfamily of cell proteins and named for the visual resemblance of a scholar rock to protein structures, the clinical-stage company is focused on advancing innovative treatments where protein growth factors are fundamental. Over the past decade, the company has created a pipeline with the potential to advance the standard of care for neuromuscular disease, cardiometabolic disorders, cancer, and other conditions where growth factor-targeted drugs can play a transformational role. Scholar Rock is the only company to show clinical proof of concept for a muscle-targeted treatment in spinal muscular atrophy (SMA). This commitment to unlocking fundamentally different therapeutic approaches is powered by broad application of a proprietary platform, which has developed novel monoclonal antibodies to modulate protein growth factors with extraordinary selectivity. By harnessing cutting-edge science in disease spaces that are historically under-addressed through traditional therapies, Scholar Rock works every day to create new possibilities for patients. Learn more about the company's approach at ScholarRock.com and follow @ScholarRock and on LinkedIn.

Summary of Position: The Director/Senior Director of Field Medical Affairs will be responsible for leading and supporting the US MSL team. The Director/Senior Director will develop the MSL strategic and tactical scientific engagement plans in alignment with the US and Global Medical and program strategy. She/He will oversee the effective execution of the field medical plan and key MSL initiatives including KOL engagement, near-term product launches, clinical development and clinical operations studies site support, scientific congress coverage, investigator initiated initiatives, data dissemination, and insights gathering. The ideal candidate will be a strong leader with a strategic and innovative style combined with a flexible, hands-on nature that works with a high sense of urgency.

Position Responsibilities: Collaborate with Medical Affairs leadership team to provide input to overall medical affairs strategy. Develop and ensure execution of the field medical plan. Manage and mentor the field based MSL team and develop qualitative and quantitative reports from field insights with external stakeholders. Complete administrative responsibilities and projects. In collaboration with Medical Communications and Medical Directors, develop, review, and revise MSL training materials and facilitate MSL team training. Expand the professional competencies and capabilities of the individual MSLs and team. Ensure each MSL territory plan is fit for purpose, up to date, and actionable. Build and foster scientific/medical relationships and partnerships with US external stakeholders. Drive overall MSL KOL engagement efforts to enhance depth of knowledge of science that is critical to the company. Facilitate efforts to enhance understanding of development plan. In alignment with the overall medical plan including communication strategy and plan, lead the development and implementation of strategies and tactics to effectively communicate complex scientific education. Effectively deliver medical and scientific presentations to diverse audiences, including physicians, pharmacists, nurses, payers, and staff.

Candidate Requirements: PharmD, PhD, MD/DO, DPTs, or equivalent required. Field Medical leadership experience required and prior launch experience is preferred. Demonstrated knowledge of regulatory, commercial, and clinical issues affecting the pharmaceutical industry is critical. Strong scientific and clinical acumen. Excellent verbal and written communication, presentation, and interpersonal skills are essential. Demonstrated strategic planning, organizational and project management abilities are required. Ability to collaborate in a team environment and
