

Lead iOS Engineer

Description

About Henry Meds: Tens of millions of Americans are unable to manage their chronic conditions with commercial medications. Using specialized compounded formulas tailored to individual patient needs, Henry helps people who have been left behind by the commercial market, all while remaining easy, accessible, and affordable. Our customers get access to the care they need, and save thousands of dollars on out-of-pocket healthcare expenses per year! Enjoy the casual culture, remote-first workplace, and generous PTO/benefits! Apply today to make a direct, daily impact in one of the fastest-growing startups in the country – we are excited to meet you! Position Overview: We are seeking a Lead iOS Engineer to architect a brand new native offering to our customers. This role requires close collaboration with cross-functional teams, including product managers, designers, and backend engineers, to ensure alignment with business objectives. Your expertise in Swift, Objective-C, iOS SDK, and strong leadership abilities will be paramount to breaking ground in this greenfield space. Duties and Responsibilities: Ensure timely and high-quality delivery of projects. Design and develop advanced applications in the iOS platform for a seamless user experience. Communicate cross-functionally with our product managers, designers, and engineers, to define, design, and ship new features. Maintain code quality, performance, and reliability. Mentor junior engineers or those interested in mobile development to foster our culture of continuous learning and improvement. Implement and keep best practices with coding standards, testing, and version control. Incorporate the latest industry trends and technologies into the development process when appropriate. Participate in the full software development lifecycle. You will likely have: 7+ years of experience building iOS applications in Swift. Mastery of iOS frameworks SwiftUI, Swift Data. Hands-on experience with automated testing frameworks such as XCTest and a commitment to writing tests for all code changes. Proficiency in refactoring code with architectural patterns like MVVM. A deep understanding of the iOS SDK and platform and ongoing dedication to learning. A track record of technical leadership and exceptional problem-solving skills. A track record of leading technical teams through positive change. Experience successfully advocating architecture improvements to multidisciplinary stakeholders. A solid CS fundamentals background. You may have: Mentorship or want to transition to people management. Start-up and/or digital health are nice to have but not required. GraphQL. Computer Science degree. Firebase. Google (GCP). XCTest. Experience HIPPA or SOC2 experience. Company Offers: Platinum PPO Healthcare + Vision & Dental (Henry covers 99% for employees and 50% for their qualified dependents). 401(k) with matching contributions beginning your first day. Unlimited PTO. Fully remote position with occasional travel. Impactful, rewarding work as part of a fast-growing brand helping thousands of people every day. Equal Opportunity Statement: Henry Meds is committed to promoting an inclusive work environment free of discrimination and harassment. We value a diverse and balanced team where everyone can belong. Applicants must be authorized to work for ANY employer in the U.S. We cannot sponsor or take over sponsorship of an employment Visa at this time. #LI-JM1 Please mention the word ****LAWFULLY**** and tag `RMzUuMjM1LjEwNy40Mg==` when applying to show you read the job post completely (`#RMzUuMjM1LjEwNy40Mg==`).
