

## LLM Teacher

### Description

Perplexity is building the next generation answer engine, empowering our users to find information in new and more effective ways. Perplexity applies LLMs for knowledge search at scale, serving millions of users across the world. In pursuit of this mission, we are looking for LLM teachers to build recommendation systems for a more engaging, easier to use product. Responsibilities Evaluate AI-generated writing based on guidelines assessing helpfulness, factuality, etc. Review the work of other teachers. Produce top-tier original content in response to prompts. You create your own working hours depending on project length. Qualifications Enrolled in or have completed an Bachelorâ??s degree or higher from an accredited institution. Native-level fluency in English Possess a strong writing style with excellent English-language spelling and grammar skills. Have a critical eye and the ability to clearly articulate the strengths and weaknesses of written text. Professional writing experience as a researcher, journalist, technical writer, editor, or similar roles Interest in AI and machine learning concepts Must have one or more of the following: Native-level fluency in one or more of the following languages: Japanese, Korean, German, French Proven background in data science or coding Note: This is a contract role paying \$30 USD per hour with an expectation of 40 hours per week. At Perplexity, we've experienced tremendous growth and adoption since publicly launching the world's first fully functional conversational answer engine just over a year ago. Our AI-powered search assistant has amassed 10 million monthly active users as of early 2024, with our mobile apps installed over 1 million times across iOS and Android devices. In 2023 alone, we served over 500 million queries from users around the globe. To support our rapid expansion, we've raised significant funding from some of the most respected investors in technology. In January 2024, we raised \$73.6 million in a Series B round led by IVP, with participation from NVIDIA, Jeff Bezos' investment fund, NEA, Databricks, and other prominent firms. We followed that up with a \$62.7 million Series B1 round in April 2024 led by Daniel Gross, valuing Perplexity at over \$1 billion. Our prominent investor base includes IVP, NEA, Jeff Bezos, NVIDIA, Databricks, Bessemer Venture Partners, Elad Gil, Nat Friedman, Naval Ravikant, Tobi Lutke, and many other visionary individuals.
