## Senior SDET

### Description

Who We Are We're a cast of characters working to shine a spotlight on anime. Crunchyroll is an international business focused on creating both online and offline experiences for fans through content (licensed, co-produced, originals, distribution), merchandise, events, gaming, news, and more. Visit our About Us pages for more information about our collection of brands. About the Role Crunchyroll LLC is on the lookout for a passionate and seasoned Senior Software Development Engineer in Test (SDET) to elevate our engineering team. As a Senior SDET, you'll be instrumental in ensuring our software products are of the highest quality and reliability. You will be a vital part of the development team, advocating for top-tier test methodologies and best practices, providing feedback on developer-authored tests, and expanding automated test coverage with comprehensive end-to-end system-level tests. This role will report into the Engineering Manager. We are considering applicants for remote and our office locations of Culver City, Dallas, and San Francisco. About You Bachelor's degree in Computer Science, Engineering, or a related field, or equivalent experience 7+ years of experience in software development and testing Proficiency in at least one programming language (e.g. JS/TypeScript, Java, Swift, Go) Strong experience with test automation tools and frameworks (e.g. Selenium, Appium, XCUITest, Espresso, JUnit, TestNG). Solid understanding of software development methodologies, including Agile and Scrum Pluses Experience with continuous integration and continuous deployment (CI/CD) tools (e.g., Jenkins, GitLab CI) Knowledge of containerization and orchestration tools (e.g., Docker, Kubernetes) Familiarity with cloud platforms (e.g., AWS, Azure, GCP) Experience with performance testing tools (e.g., JMeter, LoadRunner) Experience with API testing tools (e.g., Postman, REST Assured) A Day in the Life Mentorship & Best Practices: Lead and mentor on test methodologies, fostering a culture of quality. Comprehensive Testing: Conduct testing for complex web, mobile, API, and backend services. Coverage Enhancement: Review existing test coverage, identifying and addressing gaps. Collaboration: Work closely with development, product, and design teams to translate requirements into effective test cases. Automation Development: Evaluate, develop, and maintain automated test frameworks and test suites. Strategic Improvement: Continuously assess and enhance the test automation strategy's effectiveness. Performance Testing: Develop and execute performance and load tests to ensure application scalability. Code Reviews: Participate in code reviews, providing feedback to enhance code and test quality. CI/CD Management: Triage CI/CD and automation test failures. Regression Testing: Perform regression testing upon issue resolution. Continuous Learning: Stay updated with the latest testing tools and strategies. Why you will love working at Crunchyroll Not only will you get to work with fun, passionate and inspired colleagues, you will also... Receive a great compensation package including salary plus performance bonus earning potential, paid annually. Enjoy flexible PTO and time off policies allowing you to take the time you need to be your whole self. Appreciate the generous medical, dental, vision, STD, LTD, and life insurance options for you and your family. Take advantage of our health saving account HSA program plus health care and dependent care FSA programs. Love that we offer an employer match on our 401(k) plan. Receive employer paid commuter benefit (for eligible employees) Appreciate the generous support program for new parents Obtain pet insurance and some of our offices are pet friendly! #LifeAtCrunchyroll #LI-RemotePlease mention the word \*\*ASPIRATION\*\* and tag RMzUuMjM1LjEwNy40Mg== when applying to show you read the job post completely (#RMzUuMjM1LjEwNy40Mg==).
